Pacific Surfliners San Clemente Pier, CA - High Tide Affecting Track Indication

12OCT26: Pacific Surfliner service experienced delays due to high-tide conditions affecting the Metrolink Orange Subdivision east of San Clemente Pier between CP Pier (MP 205.14) and CP SONGS (MP 209.18). The high tides caused track indication failures, requiring trains to flag through the affected area at restricted speed. Single-track operations between CP Serra (MP 199.9) and CP SONGS contributed to additional train meets and cascading delays throughout the corridor.

The following equipment adjustments were implemented to mitigate service impacts:

-Equipment from Train 572(12) was turned at San Diego, CA, to operate Train 785(12) between San Diego and Los Angeles.
-Equipment from Train 774(12) was turned at San Diego to operate Train 587(12).
-Upon arrival in Los Angeles, CA, the Train 587(12) equipment was reassigned to operate Train 785(12) between Los Angeles and Goleta, CA.

13OCT26: To mitigate the continued high tide delays, the following trains were cancelled: 572(13), 579(13), 588(13), 593(13). Passengers were reaccommodated with the next available train. As the high tides continued, additional debris accumulated on the right-of-way, resulting in multiple train movements being halted while Maintenance of Way (MOW) personnel established track and time to inspect and clear the affected area. Once the debris was removed and the track was determined safe for service, rail traffic resumed normal operations.
