14APR26: Train 774 (14) with "UNCLASSIFIED" with C2115, 6 revenue cars, and a total of 255 downline customers, incurred an initial departure delay at San Luis Obispo, CA, MP 248.8 on the UPRR Santa Barbara Subdivision. The delay was the result of a defective compressor filter on locomotive C2115, which adversely affected air brake system performance. The operating crew, in conjunction with mechanical personnel, conducted troubleshooting and corrective actions, successfully restoring the locomotive to service. Due to the late operation, service recovery measures were implemented to ensure passenger comfort for affected customers.
