East of Barstow, CA - BNSF Freight Train Derailment

10AUG26: At approximately 6:45 PM CT, BNSF freight train S-LPCLBT1-07N, led by BNSF 6000W, derailed near East Siberia (MP 675.7) on the BNSF Needles Subdivision, approximately 69 miles east of Barstow, CA. Reports indicated that 35 railcars had overturned, blocking both Main Track 1 and Main Track 2. BNSF established an initial estimated track reopening time of approximately 24 hours while recovery and repair operations were undertaken.

As a result of the derailment and extended track outage, the following service adjustments were implemented:

- Train 4(10) was canceled between Los Angeles, CA, and Albuquerque, NM. No alternate transportation was provided.
- Train 3(09), which had already departed Albuquerque, NM, was turned at Baca (MP 114) on the BNSF Seligman Subdivision and returned to Albuquerque, where the train was terminated.
- Two buses were secured to transport Train 3(09) customers from Albuquerque, NM, to Needles, CA.
- Upon arrival in Needles, CA, passengers transferred to an additional three buses for onward transportation to Los Angeles, CA.

11AUG26: Both main tracks were open again by 4:00 PM CT with BNSF RR noting that we should expect heavy congestion through the area.

Train 4(11), carrying 171 customers onboard, was delayed at Barstow, CA, and east of the station at Control Point Barstow (MP 744.2) on the BNSF Needles Subdivision due to heavy train congestion in the area. The congestion was attributed to residual impacts from the derailment near East Siberia on the BNSF Needles Subdivision and ongoing flash flood warnings affecting operations through the corridor. Flash flood restrictions were in effect between Barstow and MP 724, and again between MP 732 and MP 719, requiring trains to operate at reduced speeds of 20 MPH and 30 MPH through the affected territory. Once traffic conditions improved and the route became available, Train 4(11) continued its trip.
