Train - Commuter Train Interference

13MAR26: At 3:35 PM-EDT, MBTA westbound commuter train MBTA-851 derailed their lead cab-car CC/828 over the no.98 switch in Tower-1 Interlocking while departing off station track no.7 at Boston South Station. No customer or employee injuries were reported. Customers were disembarked at location, and escorted back onto the station platform into Boston South Station for handling. As a result of this derailment, access to station tracks no. 7 through no.10 were blocked, resulting in significant delays arriving and departing Boston South Station, routing around the derailed MBTA equipment. In addition, inbound Train 162(13) equipment, scheduled to turn for outbound Train 167(13), was blocked-in on station track no. 9. As a result, Train 167(13) was cancelled in its entirety.

13MAR26: Due to the derailment, several trains were affect arriving and departing Boston, MA South Station due to track space and single tracking. Trains took significant delays due to having to be towed in/out of the station with a diesel engine. Train 194(13) terminated at the Back Bay Station and it's 225 customers found alternate transportation into Boston South Station.

13MAR26: at approximately 1205 AM-ET, the track supervisor advised that the cars were detached from derailed Keolis Train 851 and were pushed into the station due to a broken knuckle. At approximately 12458 AM-ET, the engine was rerailed and extra 118 took the equipment to the S&I pit. At approximately 128 AM-ET, all equipment was clear of the 98SW at tower 1. The car were set on track 7 where they will remain until the switch is repaired. ET took tracks out of service while they erected repairs.

14MAR26: Minimal delays were expect for morning service departing Boston South Station. Due to the late operation of Train 168(13) into Philadelphia at 423 AM-ET, 2'38" late, Train 144(14) took a delay departing Philadelphia, PA due to servicing.

PH Line- Broken Rail

13MAR26: At 7:15A-ET, C&S found broken rail at MP 31.8, 1 mile west of Downingtown, PA, on the PH Line. Due to broken rail, a hold was put on the track from MP 35/Thorn to MP 23.9/Frazer causing single tracking conditions through the area. Eastbound trains were delayed operating at restricted speed through the affected area. At 9:45A-ET, maintenance of way arrived on scene and took track out of service for repairs. Once repaired, train operations resumed as normal at 12:31P-ET.

Washington D.C. Commercial Power Outage

13MAR26: At 12:50P-ET, Washington Control center reported a power outage affecting the terminal and the station. The station reported radio communications were out but station personnel were assisting in making sure train status and boarding information was relayed to passengers. At 1:49P-ET, Washington Control center reported Train 155(13) would be delayed due to needing a power change. C&S responded to begin manually throwing switches. PEPCO found the cause of the outage was due to a feeder failure and began working on a reroute for power restoration. Several passengers requiring ADA accommodations needed to be reaccommodated due to the elevators being inoperable. Once the switches were manually thrown and the power change was complete, Train 155(13) departed Washington. At 4:06P-ET, power was restored to Washington.

Overhead Catenary Structure Failure at Old Portal - Catenary or Wayside Failure

13MAR26: At approximately 2:20 AM-EDT, catenary poles were reported leaning at Old Portal/MP-6.0 on the NYP-Main Line, approximately 6-miles west of New York. Upon arrival of IMC/ET personnel, multiple catenary poles were reported leaning at location due to a failed guy-wire. As a result, no.22 track was removed from service at location, between Old Portal and Old Swift/MP-7.2, and all traffic was held between New York and Newark pending disposition. At approximately 5:25 AM-EDT, no.3 track was placed into service between Hudson/MP-8.3 to Lack/MP-5.1 over North Portal Bridge, with absolute-block restrictions, and Train 66(12) continued eastward from Newark into New York. At approximately 5:45 AM-EDT, westbound hold was released at New York, and train operations resumed. As a result of this disruption, the following Northeast Corridor service adjustments were implemented:

- Train 150(13) cancelled in entirety, Philadelphia to Boston
- Train 135(13) will originate in Philadelphia, cancelled Boston to Philadelphia
- Train 607(13) cancelled in entirety, New York to Harrisburg, PA
- Train 648(13) cancelled in entirety, Harrisburg, PA to New York

Trains 144(13) and 103(13) were originally scheduled to Terminate and Originate at Newark. however it was decided to allow Train 144(13) to operate through upon arrival

Due to the disruption, multiple trains were delayed between 15"-25" operating between Newark and New York. All affected Amtrak passengers were notified via Service-360 allowing impacted customers to self-accommodate to other available services, or request a refund. NJT reduced scheduled service by 30" in the morning from the Coast Line, and from Trenton (approximately 50% reduction of scheduled service).

Amtrak IMCS ET and Production staff report that no.22 track between Old Swift and Old Portal is expected to be returned to service by approximately 5:00 AM-EDT on Saturday March 14th. As a result, no further service adjustments are planned, and the current level of service will operate tomorrow, Saturday March 14th, as scheduled.

CSX Trackwork effecting Carolinian, Floridian, and Northeast Regional Service - M of W Work

26-FOI-00361

00000006086

"UNCLASSIFIED"

4/29/2026

23FEB26: Due to CSX Trackwork on the North End subdivision between Petersburg, VA MP A42.0 and Rocky Mount, NC MP A104.0 from Monday February 23 to Monday March 2 and Monday March 9 to Monday March 16. The following service adjustments have been made for the Carolinian, Floridian and Northeast Regional Service.

Carolinian

- Train 80 (23Feb-16Mar) will operate 45-minutes LATER between CLT and RGH, 2-hours LATER between RGH and WAS, 2 hours 10-minutes LATER between WAS and PHL, and 2 hours 20-minutes LATER between PHL and NYP.

Floridian

- Train 40 (22Feb-15Mar) will operate on their normal schedule between MIA and SAV, and then will operate 1 hour 30-minutes LATER between SAV and RGH and 2 hours 45-minutes LATER between RGH and CHI.

Northeast Regional

- Train 94 (23Feb, 24Feb) will operate 3 hours 10-minutes LATER between NFK and WAS.

2/26/26 - Trains 40(25), 90(26), 80(26) and 79(26) were all delayed between Petersburg, NC and Rocky Mount, NC for a 4-way passenger train meet as a result of CSXM807 in penalty at Stony Creek Interlocking in the affected track work location..

3/11/26 - Trains 89(11) and 79(11) were delayed between Petersburg, NC and Rocky Mount, NC as a result of congestion throughout the affected track work location.

3/12/26 - Trains 40(11), 41(11), 80(12), 89(12), 90(12), 79(12), 52(11) and 53(12) were all delayed between Petersburg, NC and Rocky Mount, NC as a result of speed restrictions and congestion throughout the affected track work location.

Train 370(13) East of Grand Rapids, MI - Utility Company Failure

14MAR26: Train 370(13) operating with engine 4627, 4 coaches and 61 customers was terminated 2 miles west of Grand Rapids, MI, on CSX Grand Rapids Term subdivision, due to power lines being down interfering with the right of way. With no ETA on a track inspector or the power company, the decision was made to source a bus to accommodate customers. The bus arrived approximately 1:20am-et, meanwhile, train 370(13) reversed a few feet to get to a more favorable location to detrain customers. Once in position, train 370(13) customers detrained and boarded the bus to continue to Grand Rapids. 370(13) equipment waited for the power company to clear the downed wires from the tracks.

Train 5(12) West of Helper, UT - Engine Failure

14MAR26: Train 5(12), consisting of Engines 23 and 14, 8 coaches, and 142 customers, experienced multiple mechanical issues that significantly impacted its operation 21 miles west of Helper, UT, on UP Provo subdivision at milepost 647.8. The initial problem occurred with the lead locomotive, Engine 23, which developed fuel pump issues. As a result, the crew isolated Engine 23 and continued operating with a single locomotive. This mechanical failure caused Train 5(12) to depart approximately 23 minutes late. Union Pacific (UP) was contacted to source a replacement locomotive, and UP identified freight locomotive UP8154, located in Sparks, Nevada, as a unit that would eventually be provided to support Train 5(12).

While operating westbound with Engine 23 isolated, the train encountered further difficulties when the remaining locomotive, Engine 14, began to overheat while ascending a 2 percent grade west of Helper, Utah, near milepost 654. The train was forced to stop multiple times due to repeated overheating faults on Engine 14. The crew was able to stop and reset the fault several times and initially believed the overheating was caused by the sustained grade. They attempted to manage the situation by stopping periodically to allow the locomotive to cool, waiting approximately ten minutes between attempts. Although the crew expected the overheating to subside once the train cleared the grade, the issue persisted.

As Train 5(12) continued to make slow westward progress with repeated cooling stops, a longer-term recovery plan was implemented to stabilize operations. UP identified locomotive UP5833 in Salt Lake City, Utah, and scheduled a crew to report on duty at 2:15 a.m. Mountain Time to move that unit into position. Additionally, when Train 6(13) arrived in Salt Lake City, it was planned that its lead unit, Engine 37, would be cut from the consist, wye'd, and placed on the rear of Train 6(13), while UP5833 would be added to the head end. Train 6(13) was then scheduled to deliver Engine 37 to Train 5(12) en route. In conjunction with this plan, Train 5(12) was still scheduled to receive freight locomotive UP8154 in Sparks, providing the necessary additional power to fully resolve the mechanical challenges and restore reliable operation.

As service recovery, snack packs, water, tea and coffee were provided to customers. Normal dinner service was feld for sleeping car customers.

WBS # B.TR.100150.6542 has been issued.

Train 716(13) Corcoran, CA - Engine Failure

13MAR26: At 7:26 PM PT, Train 716(13), operating with locomotive CDTX 8304 and seven cars pushed by locomotive CDTX 2106, was delayed departing Corcoran after a loss of tractive effort and Head End Power. The train carried 113 passengers, with no special service needs. Weather conditions were 67°F and cloudy. While the crew investigated, catering staff conducted 15-minute walkthroughs offering complimentary bottled water. Corcoran is an unstaffed station.

The crew identified a fuel-related locomotive fault that could not be repaired on site. Train 704(13) was dispatched to assist. After coupling at Corcoran, the combined consist operated to Bakersfield, upon completion of required safety tests, the train continued to Wasco.

North of Kelso, WA BNSF Mudslide / 48hr Moratorium on Passenger Trains

13MAR26: Beginning 12:20PM-PT, Friday March 13th, 2026 the BNSF Railway imposed a 48-HR Moratorium on passenger conveying services between Portland and Seattle in both directions. This was a result of heavy rainstorms dumping debris and mud with continuing rainfall. Tracks were closed to allow for clear up and qualified inspection.

Both main tracks were covered with mud and debris 6 miles north of Kelso at Ostrander, MP 91.1 BNSF Seattle Subdivision.

UPDATE: A third qualifying blocking event was reported at the same location, extending the moratorium thru 5:30PM-PT on 15th March.

Passenger services were suspended until 2:30PM-PT Sunday, 15TH March 2026 with ticket sales suspended.

The following amended train plan was instigated:

Train 504(13) returned to Portland shortly after arriving Kelso. Replacement buses were arranged in Portland to take passengers stations Centralia thru Seattle.

Train 517(13) Returned to Seattle from Tacoma Dome. Passengers transferred to replacement buses in Seattle thru to Portland.

Train 507(13) - Originates Portland - Replacement buses available to stations Seattle thru Portland.

Train 507(13) returned to Seattle shortly after departing Tacoma. Replacement buses were not available. Passengers required to wait for replacement buses for 511(13) for stations to Seattle.

Train 14(12-13) Terminated Portland - Replacement bus service operated for stations to Seattle. The original plan to operate the train deadhead thru to Seattle was abandoned when trains experienced lengthy delays waiting for a route thru the area of the blocking event. The train operated deadhead back to Portland to be serviced/turned for 11(27) Originating in Portland.

Train 503(14-15) Originates Portland - Replacement bus service operates Seattle to Portland.

Train 505(14-15) Cancelled - Replacement bus service operates Seattle stations to Portland.

Train 517(14-15) Terminates Seattle - Replacement bus service operates Seattle stations thru to Portland.

Train 507(13-14-15) Originates Portland - Replacement bus service operates Seattle to stations thru Portland.

Train 509(13-14) Cancelled - No alternate buses available. Passengers required to utilize replacement buses for 511(13)

Train 511(13-14) Cancelled - Replacement bus service operates Seattle to Portland.

Train 500(14-15) Cancelled - Replacement bus service operates Portland Thru to Seattle.

Train 502(14-15) Cancelled - Replacement bus service operates Portland Thru to Seattle.

Train 504(14-15) Terminates Portland - Replacement bus service operates Portland Thru to Seattle

Train 518(13-14-15) Originates Seattle - Replacement bus service operates Portland Thru to Seattle.

Train 506(13-14) Cancelled - Replacement bus service operates Portland Thru to Seattle.

Portland for passengers. Train operates deadhead Seattle to Portland.
 Train 14(12-13) Terminates Portland - Replacement bus service operates to stations to Seattle for passengers. Train operates deadhead Portland Thru to Seattle.

UPRR Mineola Subdivision Track Work - Scheduled M/W Work

11MAR26: Union Pacific Railroad has trackwork scheduled on their Mineola Subdivision between Fort Worth, TX and Longview, TX, on numerous dates between Thursday March 12th and Tuesday, April 28th, 2026. To accommodate this infrastructure work, Amtrak's Texas Eagle Service has been adjusted as follows:

-Train 21(12Mar-16Mar, 23Mar-30Mar, 6Apr-12Apr, 20Apr-27Apr), which operates between Chicago and San Antonio, will utilize a bus bridge in lieu of train service between Marshall and Fort Worth. The Fort Worth to San Antonio section will operate as Train 1021(13Mar-17Mar, 24Mar-31Mar, 7Apr-13Apr, 21Apr-28Apr) and will operate 80-minutes later between Fort Worth and San Antonio, departing Fort Worth at 3:48pm.

Train 421(13Mar, 15Mar, 24Mar, 27Mar, 29Mar, 7Apr, 10Apr, 12Apr, 21Apr, 24Apr, 26Apr), which normally operates between Chicago and Los Angeles, will originate at Fort Worth and will operate 80-minutes later between Fort Worth and San Antonio, departing Fort Worth at 3:48pm.

-Train 22(13Mar-17Mar, 24Mar-31Mar, 7Apr-13Apr, 21Apr-28Apr), which operates between San Antonio and Chicago, will utilize a bus bridge in lieu of train service between Fort Worth and Marshall. The Marshall to Chicago section will operate as Train 1022(13Mar-17Mar, 24Mar-31Mar, 7Apr-13Apr, 21Apr-28Apr) and will operate 2-hours later between Marshall and St. Louis (departing MHL at 9:29pm), and 2 hours 15-minutes later between St. Louis and Chicago (departing St. Louis at 10:25am).

-Train 422(11Mar, 13Mar, 15Mar, 22Mar, 25Mar, 27Mar, 29Mar, 5Apr, 8Apr, 10Apr, 19Apr, 22Apr, 24Apr, 26Apr), which normally operates between Los Angeles and Chicago, will terminate at Fort Worth.

ALTERNATE TRANSPORTATION

-Bus 3021 will provide alternate transportation at Marshall, Longview, Mineola, Dallas, and Fort Worth

-Bus 3022 will provide alternate transportation at Fort Worth, Dallas, Mineola, Longview, and Marshall

**Please Note: During trackwork days, Bus 6022 from Houston and Buses 6122 and 6421 from Shreveport will be redirected to Marshall, instead of Longview, and Bus 6021 to Houston and Buses 6121 and 6422 to Shreveport will depart from Marshall.
