Portal North Bridge - Delays/ M of W Work

18FEB26: Train delays were largely attributable to Amtrak's cutover work transferring service from the 115-year-old Portal Bridge to the new Portal North Bridge. The multi-week construction effort resulted in reduced Amtrak and NJ TRANSIT service levels through the area, which created operational constraints and contributed to slower movement and periodic congestion. Although trains continued to operate throughout the day, the limited track availability and ongoing infrastructure adjustments frequently impacted scheduled operations
