14JUL26: Train 233(14) was delayed at New York Penn Station with engine E/104-717 and carrying 208 customers, departed New York, NY, on time from the Amtrak New York Terminal. Upon arrival at NYP, Mechanical personnel conducted troubleshooting efforts before Train 233(14) made a second departure attempt. Shortly after departing, the engineer reported that the same faults had reoccurred, necessitating a second return to New York Penn Station.

All customers were subsequently detrained. The equipment was then moved to Sunnyside Yard and looped so that engine E/717 could lead the consist. After returning to NYP, Train 233(14) departed for a third time and operated without further incident.
