Operating Highlights

Train 148(30) North of Hartford, CT - Tree Strike

30OCT25: At 10:33 p.m. train 148(30) operating with engine 115 and 8 cars was delayed 3 miles north of Hartford, CT on the Amtrak MRS subdivision after striking a tree between Midland and Meadow near milepost 39.0. The crew inspected after the train lost main res pressure and found that the tree was wedged under the plow and caused damage to the windshield and mirror along with extensive damage to the main res pipe. Headend power remained operational and there were no reported injuries to customers or crew. Maintenance of Way and Amtrak management were on site to assist in the removal of the tree. It was discovered a second tree was blocking the south end of 148(30) equipment in addition to the north tree which was struck. Shuttle set 478(30) was utilized to perform a trainside transfer of 53 passengers and arrived on site at 12:03 a.m. and completed the transfer at 12:32 a.m. Rescue shuttle set 110 was dispatched from New Haven, CT to tie on to the rear of 148(30) equipment and operate south back to New Haven, CT to store for service in the morning.

Due to 148(30) equipment being taken back to New Haven, CT, train 125(31) originated New Haven, CT with alternate transportation provided by bus from Springfield, MA to Hartford, CT. Any customers travelling from Hartford, CT to New Haven, CT were able to take CT Rail services.

Train 237(30) North of Hudson, NY - Tree Strike

30OCT25: At 7:03 P.M. train 237(30) operating with lead unit 703, 5 cars, and engine 92 struck a tree at milepost 135.0 on 1 track 20 miles north of Hudson, NY on the Amtrak Hudson Line. The crew was able to release the lead unit brakes on the 703 from the rear unit 92 and operate restricted speed into Albany.

Engineering removed the tree that was struck south of Albany which caused train 64/68(30) to depart Albany late waiting until engineering was off the tracks.

Amtrak NYP Line - Flooding at Hunter Interlocking

30OCT25: At 3:02PM, Train 97(30) stopped in emergency on the No. 3 track at the Hunter Interlocking/MP10.5 on the Amtrak NYP Line. The crew reported that all tracks were under water at the interlocking. It was found that the 'A' track was not impacted and was the only track open through the area until the waters receded. This caused delays to all traffic eastbound and westbound. Single tracking occurred between Elmora/14.7 and Newark, NJ/MP8.8. At 4:17PM, Train 97(30) was able to recover after finding parted hoses which were repaired and a successful brake test was complete. At 4:37PM, the water had receded, tracks were inspected, and all tracks were cleared for normal operations to resume. Lingering delays remained through the area working through congestion that had built up.
