Train 643(11)- Philadelphia to Harrisburg main line - Signal

11NOV25: As of 1152A-ET, CETC Power Director requested a signal flip MP 46.3/Park to MP 68.1/Cork resulting in 100HZ lost at MP 57.0/Leaman, MP 66.1/Holland and MP 67.1/Conestoga. Currently all interlockings are unable to display signals or throw switches. Route was line track 2 to track 7. Leaman and Holland were lined for straight moves. Train 643(11) received 241 at Leaman and operated restricted speed to Holland on track 4 inspecting the tracks for any obstructions. C&S Maintainer arrived at Conestoga and manually lined switches on the ground and then spiked and wedged.

As of 1245P-ET, Signal power was restored between Conestoga to Holland. Leaman was still without signal power.

As of 156P-ET, All power was restored to all interlocking on the Philadelphia to Harrisburg main line and was holding.

Train 643(11) with E/646 and CC/9633 cut out cabs on the CC/9633 due to 2 non conforming consecutive signals west of MP 25.3/Glenn Interlocking. Train 643(11) operated restricted speed from MP 33.5 to MP 35.0/Thorn where the 'C' light could be displayed then they operated 59MPH to MP 104.6/State.

Due to ACSES being cut out on train 643(11) CC/9633 that turns back for 652(11) it was necessary for train 652(11) to wye in Philadelphia. It was also necessary to loop in New York for 657(11) and wye in Philadelphia.
