Operating Highlights

Train 167(18) - Trenton, NJ - Engine Failure

18APR26: Train 167(18) was delayed at Trenton Station/MP 56.8 on the Amtrak New York to Philadelphia Line due to an initial report of a hot journal alarm, for which the conductor inspected and reported no exceptions. Further delays was caused by the crew consulting with the on duty RFE for a previous on board rail integrity alarm. The train pulled just west of the station for further examination on both sides per RFE instruction. Because the Hot Journal Alarm registered in the cab but did not indicate which axle, it was necessary for the crew to individually inspect each axle on both sides of the train. This prolonged the delay.

Upon completion of the inspection, no exceptions were taken. The train was restricted to 50mph for the next ten miles - after which, another inspection was conducted. There were no exceptions.

Train 126(18) Washington, DC - Cab Car Failure

18APR26: Train 126(18) operating with locomotive 668, cab car 9646, and 10 cars was delayed departing the initial terminal of Washington due to cab car 9646 being stuck in a suppression penalty. Due to the penalty the cab car would not be able to operate in the lead and required the train consist to go around the wye prior to departure. After the equipment went around the wye it was positioned back in the station 345 customers boarded and train 126(18) departed at 4:39PM-ET.

Train 87(18) Boston, MA - initial Terminal Delay - Car Failure

18APR26: Train 87(18) operating with locomotive 660, and 9 cars was delayed due to car failure with 82730 requiring the car to be replaced prior to departure. After car 82730 was replaced, the trainset had further issues with the doors on the consist requiring more troubleshooting from mechanical prior to release from the yard. Once mechanical was able to make a positive repair the equipment was released from the yard and staged in the station for customer boarding. Once all of the customers were boarded train 87(18) was able to depart at 10:58AM-ET.

Train 290(18) Rutland, VT - Engine Failure

18APR26: 290(18) operating with locomotives 704 and 700, 5 cars and 161 customers onboard was delayed at Rutland due to receiving a penalty on locomotive 704 that prohibited movement. With the assistance of mechanical it was determined it was necessary to cut out cab signals to allow the train to recover and allow movement to resume. Once entering Amtrak property after Schenectady, the train operated by rule 556 not exceeding 59mph to Albany. At Albany locomotive 700 was be used to cap locomotive 704 for operation to New York. After departing Albany train 290(18) was able to resume normal operating speeds and proceed without any further delay.

CSX Heat Orders

18APR26: CSX implemented heat-related speed restrictions between 1:00 PM ET and 7:00 PM ET, resulting in lengthy operational delays across multiple subdivisions. Affected subdivisions included: Columbia, Keystone, Peninsula, RF&P, Auburndale, Carters, Jacksonville Terminal, Lakeland, Nahunta, Sanford, Savannah, North-End and Tampa Terminal. These heat orders significantly impacted train velocity and overall service reliability during the affected timeframe.

Train 661(18) Philadelphia, PA - Engine Failure

18APR26: Train 661(18) operating with locomotives 602-653, 5 cars and 169 customers onboard experienced cab signal failure on locomotive 653 at Zoo interlocking at MP 2.3 on the Amtrak PH Line. After cutting out the cab signals train 661(18) was able to proceed and by rule operated at speeds not exceeding 59mph for the remainder of their trip to Harrisburg.

Train	Delay	Comment
661(18)	37"	

Train 79(18) Trenton, NJ - Car Air Bellows

18APR26: Train 79(18) operating with locomotive 623, 7 cars and 180 customers was delayed at Trenton Station due to mechanical issues with car 25042. The crew inspected the equipment and found over inflated air bellows and a chip on the pantograph on locomotive 623. The crew was able to advance the train to Philadelphia where it was met by mechanical and mechanical was able to resolve the air bellow issue by making adjustments to multiple cars to ensure even ride height and eliminate the risk of tripping hazards between cars. Once the adjustments were completed Train 79(18) was released to continue towards Washington.

Passenger Removals and/or Isolations***Train 664(18) Passenger Removal at Philadelphia, Pennsylvania – Fare Evader***

18APR26, Unknown Passenger without a PNR, traveling from Coatesville, PA to an undetermined destination reportedly refused to purchase a ticket after numerous excuses and stories. The passenger was advised of SEPTA commuter services however refused to detrain. The passenger exited at Philadelphia station. Amtrak Police notified.

Delay: **664 (18)** **None**

Train 89(18) Passenger Removal at Rocky Mount, North Carolina – Improper Conduct

18APR26, Passenger on PNR E2F4E8, traveling from BWI Thurgood Marshall Airport, MD to Florence, SC was reportedly drunk, and belligerent and decided to detrain at his free will at Rocky Mount station. Amtrak Police notified.

Delay: **89 (18)** **None**

Train 147(18) Passenger Removal at Charlottesville, Virginia – Unaccompanied Minor

18APR26, Unknown Minor Male Passenger without a PNR, traveling from Washington, D.C. to an undetermined destination was reportedly discovered traveling inside the quiet car without proper ticketing. The minor appeared to be approximately 10yrs old. The child refused to communicate his name, parents name, address, or his destination. Amtrak Police assisted with getting local authorities to our Charlottesville station to take custody of the child. The child advised the officer his parents lived near Washington D.C. The child exited the train and station with the officer. Amtrak Police notified.

Delay: 147(18) None

Operating Highlights***Train 14(18) South of Oakland, CA - Signal***

19APR26: Train 14(18), carrying 154 customers onboard, was delayed while operating on the Union Pacific Coast Subdivision between San Jose, CA, and Oakland Jack London Square due to restrictive signal indications of unknown cause. The crew encountered stop signals at MP 20.4, MP 18.4, and MP 16.9, followed by an advance approach indication at MP 15.7. In accordance with operating rules, the crew was required to proceed through the affected territory under signal authority, resulting in reduced speeds and delay. Once the train cleared the restrictive signal zone and normal indications resumed, Train 14(18) continued its northbound trip.

Train 716(18) Turlock-Denair, CA - Third Party Contractor Engine Failure

18APR26: Train 716(18), operating with CC/C8310, seven cars, locomotive E/C2010, and 74 customers onboard, was delayed at Turlock-Denair Station (MP 1079.6) on the BNSF Stockton Subdivision while crews worked to troubleshoot a locomotive control issue. The crew reported problems with the alerter system, noting the locomotive repeatedly went into penalty and continuously requested movement of the handle into suppression, preventing normal operation. The crew coordinated with local Amtrak management and TASI Mechanical technicians to reboot the locomotive systems. Once the alerter fault was resolved and the locomotive was verified safe for service, Train 716(18) was released to continue.

Train 564(18) West of San Diego, CA - Engine Failure

18APR26: Train 564 (18), E/C2115- 5 cars -CC/6907, experienced excessive wheel slip at Scripps, MP 250.95, approximately 14 miles west of San Diego, CA, on the NCTD San Diego Subdivision. The delay was attributed to low sand on the locomotive, resulting in the train being unable to crest the grade. During troubleshooting, head-end power (HEP) dropped. There were 155 customers onboard; ambient conditions were 66 degrees and sunny. Unable to resolve the issue at location, the crew shoved the train back to NCTD Sorrento Valley Station, where customers were transferred to Train 566(18). Train 564(18) was terminated at location, and the equipment was deadheaded to San Diego. Train 573(18) was delayed for Train 564(18) to clear.

Train 51(17) South of Rensselaer, IN - Trespasser Incident

18APR26: At 8:05AM-CT, Train 51(17), E/137-6 Cars, with 94 customers onboard, struck a tractor-trailer fouling the single main track at the 210 E. Road crossing (DOT #341236H) on the CSX Monon Subdivision. The collision occurred 8.49 miles south of Rensselaer, IN (MP 72.3), in Jasper County, at MP 80.79, with the train stopping at MP 80.6. At the time of the strike, Train 51(17) was operating at 58 MPH, with a maximum timetable speed of 60 MPH through the crossing. Weather conditions were 57.2 degrees and cloudy. The crossing was equipped with two crossbucks, two stop signs, two advance yield signs, and an ENS sign. Head-end power (HEP) remained on to the trainset, and the train remained intact and on the rail.

The truck driver was injured, and EMS responded to the scene. One onboard sleeping car attendant and two customers requested medical assistance for non-life-threatening injuries. The crew advised they would take trauma relief upon return to their crew base. Reported equipment damage included shattered windshields and condemnable plow damage on Engine 137, as well as minor damage to the steps and side of the vestibule on Car 25063. Amtrak's Indianapolis Road Foreman was on the train at the time of the incident. Service recovery measures were implemented, including the distribution of snack packs and bottled water.

Only one bus was able to be sourced, arriving at 12:00PM-CT, to transport 56 of the 94 customers to Dyer and Chicago. The plan was that, if the train was not back on the move by the time the bus returned, it would pick up the remaining customers. Chicago Mechanical arrived on scene at 11:00AM-CT, and additional Transportation management personnel also responded. CSX freight locomotive CSXT 919 was sourced to be added to the head end once the plow was cut, allowing the equipment to continue to Chicago. At 3:18PM-CT, Train 51(17) resumed movement; however, due to PTC issues, the train was reduced to 30 MPH. At Dyer, Train 51(17) was terminated, with all remaining customers boarding the bus to Chicago. After customers detrained, the equipment deadheaded to Chicago to turn same day as Train 48/448(18). The 51(17) deadhead equipment was delayed entering the Chicago, IL yard due to PTC incompatibility between the CSXT 919 and Amtrak. The equipment waited for a yard crew with an engine to couple up and bring train 51(17) into the yard.

Train 50(18) was made up with the original equipment off train 48/448(18). Train 50(18) was delayed departing Chicago Union Station, IL/MP0.0 due to OBS crew members arriving in Chicago, IL off the bus from Dyer, IN with 51(17) customers. Train 48/448(18) was delayed departing Chicago, IL holding for equipment off deadhead train 51(17) when it arrived in Chicago, IL.

Train 704(17) North of Fresno, CA - Trespasser Incident

18APR26: Train 704(17), operating with engine 2106, 6 coaches, and 108 customers, struck a trespasser at approximately MP 1007.1, ten miles north of Fresno, California, on the BNSF Stockton Subdivision. No injuries were reported to the crew or customers, and no equipment damage was identified; however, the incident was a confirmed fatality. Local authorities responded to the scene, and the engineer remained in communication with police while the crew addressed a loss of head-end power (HEP) caused by an error on locomotive 2106. Trauma relief was requested for the crew. Amtrak Road Foreman, along with CNOC mechanics and Siemens technicians, assisted with troubleshooting and resetting the locomotive. Amtrak Train Master arrived on scene, the coroner removed the body, and BNSF subsequently released the scene. Service recovery actions were initiated, including the distribution of snack packs and water to customers. HEP was restored at 10:42 PM PT, after which the crew worked to recover air. Train 718(17) was held and later repositioned to assist, ultimately arriving on scene and coupling to Train 704(17), with plans for the two trains to double-draft from Fresno to Bakersfield.

The combining of the two train sets was unsuccessful due to a damaged air hose between the two sets. Repairs were attempted but unsuccessful. Due to single track conditions, both trains held for a recrew engineer for train 704(17) which arrived approximately 1:25AM-PT.

Upon arrival of the recrews, Train 704(17) departed Fresno, CA and met a relief conductor at Wasco, CA. Due to limited recrew availability, Train 718(17) was held at Wasco, CA pending the recrew off Train 704(17) to operate into Bakersfield. Train 704(17) arrived into Bakersfield at 4:27A, where the equipment was tied down. Following tie-down, the recrew boarded Train 711(18) and deadheaded to Wasco, CA to operate Train 718(17) into Bakersfield, arriving at 5:55A, 5 hours 50 minutes late.
