Operating Highlights

Train 146(28) - New Haven, CT - Car Failure

29DEC25: Train 146(28) was delayed at New Haven Station due to trainline issues. The crew with assistance from mechanical, was able to resolve the issue.

Train	Delay	Comment
146(28)	55"	

Train 2259(28) - West of Providence, RI - Engine Failure

29DEC25: Next Gen Acela Train 2259(28) was delayed as it traveled west then south between Providence, RI and Washington, DC. Power car 2125 experienced ACSES failure and was limited to 59MPH on Metro North Territory and 79MPH on Amtrak Territory. There were no inspected available sets to swap with at New York Penn.

Train	Delay	Comment
2259(28)	1'40"	

West of Boston South - Catenary or Wayside Failure

29DEC25: Approximately 11:45PM The Legacy Acela set 14 lost its west end pantograph on power car 2015, while traversing Tower 1 Interlocking/MP 228.5. The pantograph became tangled in the catenary. This caused a loss of power throughout the entirety of Tower 1 Interlocking. Emergency plates immediately went into effect.

All inbound traffic from the west and South Hampton Yard was halted.

ET and C&S Personnel responded.

Passengers that were on Train 132(28) were transferred to the diesel Keolis set 5892.

Passengers on Train 166(28) were transferred to the 132(28) equipment at Route 128 because the 132(28) equipment was within dimensional tolerances for the only available route into Boston South Station.

4:50AM A diesel engine was tied onto the 2151(29) equipment and towed it back to the yard. Tower 1 interlocking cleared of the disabled equipment.

Train	Delay	Comment
132(28)	Term Route 128	Pax to Diesel Keolis Set
166(29)	Term Route 128	Pax to 132(28) EQ for travel into BOS
2151(29)	Cancelled	

Train 283(28) - East of Syracuse, NY - Engine Failure

29DEC25: Train 283(28) ~~28-FOF00217~~ ~~00000005561~~ the "UNCLASSIFIED" case 1/5/2026. Original Subdivision between Rome and Syracuse due to the horn failing on E/92. This en route failure necessitated the crew stopping and protecting all grade crossings. The train was met by CSX Mechanical at Syracuse Station and the issue was resolved.

Train	Delay	Comment
283(28)	1'20"	
283(28)	20"	SYR Station

Train 161(28) - West of New York - Passenger Train Interference

28DEC25: Train 161(28) incurred multiple delays between New York and Washington, DC. The causes for these delays include Passenger train interference, wheel slippage and high passenger counts.

A WBS # was issued to accommodate passengers on Train 161(28) who misses connections in Washington, DC.

WBS#: B.TR.100151.0794

Train 2292(28) Manor, NY - Engine Failure

28DEC25: Train 2292(28) was delayed at Manor, NY due to engine failure. 185 passengers onboard was disabled on the MNRR New Haven Line at CP 216/New Rochelle on track 2. They reported having multiple alarms and unable to draw power from either end. The train was able to maintain HEP. The crew was working with High Speed mechanical to try to rectify the issue. Crew reported they were unable to operate more than 5MPH on the east or west end power cars. Rescue E/645 departing New York at 1007A-ET to assist in bring equipment back to New York. The equipment was not able to operate over 5MPH they advanced to New Rochelle where passengers were transferred to trains 162(28), 54(28) and 2248(28). The equipment then operated back to Manor where the rescue engine was tied on and brought the equipment back to New York.

This also cancelled train 2257(28) due to no equipment for the turn.
This incident impacted Acela Trains and turns for the duration of the day.
