Train 42(27) West of Johnstown, PA - Engine Failure

27NOV25: At 8:48 a.m. Train 42(27), operating with Engine 129, seven cars, and 149 passengers, no ADA, onboard, experienced a loss of Head-End Power (HEP) and tractive effort approximately 10 miles west of Johnstown, Pennsylvania, at milepost 286.1 on the Norfolk Southern Pittsburgh District. The outside temperature was 27 degrees, and all passengers were reported to be comfortable. The crew collaborated with CNOC Mechanical to address issues related to oil temperature and pressure. By 9:35 a.m., HEP and tractive effort were restored, and Train 42(27) resumed its eastbound movement. Norfolk Southern train NS51-27 met Train 42(27) at Milepost 277.7 to provide assistance by adding freight units NS7237 and NS7254 for the journey to Altoona. Upon arrival in Altoona, Train 42(27) removed the prior helper units and added Norfolk Southern Engine NS1026 to continue operations to Harrisburg. After reaching Harrisburg, the train set off NS1026 and added Engine 660 to proceed to Philadelphia.

26 JUL 2016 14:00:05Z UNCLASSIFIED 12/17/2025
Amtrak Post Road Branch North of Albany-Rensselaer, NY - Track Repairs

02JUN25: Train 448(01) was terminated at Albany due to track structure issues three miles north of Albany on the Amtrak Post Road Branch at MP 196.2. Buses were secured for all passengers between Albany and Boston. Train 449(02) was not effected due to being cancelled for trackwork already. Additionally, due to the issue and unknown time for repairs, trains 448(02-09JUN) and 449(02-09JUN) were cancelled between Albany and Boston with alternate bus transportation with the exceptions of stops of Framingham and Back Bay.

18JUN25: The trackwork is now extended through Sunday, July 27th. As a result, the following service adjustments are in place:

- Train 448(02JUN-26JUL) will terminate at Albany with Bus#3448 providing alternate making all stops except Framingham and Boston Back Bay.
- Train 449(02JUN-28JUL) will originate at Albany with Bus#3449 providing alternate making all stops except Boston Back Bay and Framingham.
- Train 1237(20Jun, 27Jun, 3Jul, 11Jul, 18Jul, 25Jul) will terminate at Albany with Bus #3237 providing alternate between Albany and Pittsfield.
- Train 1233(22Jun, 29Jun, 6Jul, 13Jul, 20Jul, 27Jul) will terminate at Albany with Bus# 3233 providing alternate between Albany and Pittsfield.
- Train 1246(22Jun, 29Jun, 6Jul, 13Jul, 20Jul, 27Jul) will originate at Albany with Bus# 3246 providing alternate between Pittsfield and Albany.

24JUL25: The trackwork is now extended through Sunday, November 30th. As a result, the following service adjustments are in place:

- Train 448(02JUN-28Nov) will terminate at Albany with Bus#3448 providing alternate making all stops except Framingham and Boston Back Bay.
- Train 449(02JUN-30Nov) will originate at Albany with Bus#3449 providing alternate making all stops except Boston Back Bay and Framingham.
- Train 1237(25Jul, 1Aug, 8Aug, 15Aug, 22Aug, 29Aug, 5Sep) will terminate at Albany with Bus #3237 providing alternate between Albany and Pittsfield.
- Train 1233(27Jul, 3Aug, 10Aug, 17Aug, 24Aug, 1Sep, 7Sep) will terminate at Albany with Bus# 3233 providing alternate between Albany and Pittsfield.
- Train 1246(27Jul, 3Aug, 10Aug, 17Aug, 24Aug, 1Sep, 7Sep) will originate at Albany with Bus# 3246 providing alternate between Pittsfield and Albany.

*Note: Due to Labor Day, Berkshire Flyer Trains 1233 and 1246 are not operating on Sunday August 31st, but will operate on Monday September 1st.

23OCT25: Train 448(29NOV) and Train 449(01DEC) will be the first trains operating normal when service resumes on 30NOV.

Delay: 48 (26) 3"

Operating Highlights

Train 14(27) North of Salinas, CA - Trespasser Strike

27NOV25: At approximately 7:27PM-PDT, train 14(27) operating with camera equipped locomotive AMTK/331 leading AMTK/361 and 9 cars, collided with a trespasser 63 miles north of Salinas, CA. The trespasser suffered unknown injuries and was transported to a local hospital for treatment. The incident occurred in the San Jose Suburb of Seven Trees in Santa Clara County, MP 50.1 on the Coast Subdivision of the Union Pacific Railroad. The incident did not occur at a designated rail crossing. There were no reported injuries to 179 passengers or crew. No damage was reported to the train. Locomotive AMTK/331 provided Head End Power for the duration of the incident. The weather was reported as dark, cloudy with a temperature 50°F. The track speed at location is 79mph. The data recorder was downloaded on the scene by responding road foreman from San Jose. The Engineer request trauma relief, after advancing the train the short distance to San Jose. The Conductor continued with their assigned tour, taking the train to Sacramento. The local San Jose Police and Fire Dept. closed the tracks while investigating the incident. Amtrak Police and EAP advised. California Office of Emergency Services# 25-6000

Train 352(27) Battle Creek, MI - Engine Failure

27NOV25: Train 352 (28-FOI-00167) with locomotive E/4615, "UNCLASSIFIED" as a 12/17/2025 17 passengers, experienced intermittent Head-End Power (HEP) issues after setting off a dragging detector at Milepost 107, 15 miles east of Battle Creek, MI, on Amtrak Michigan line subdivision. The crew stopped to inspect the train and successfully restored HEP after a few minutes; however, the power failed again once the train resumed movement. The crew began troubleshooting by checking cables within the consist. An Amtrak Road Foreman (RFE) was dispatched with an estimated arrival time of 1 hour and 45 minutes. The total duration of HEP loss was approximately 10 minutes at the time.

While continuing troubleshooting efforts, the crew attempted short-looping cables, and HEP remained intermittent as they worked between cars. Train 352(27) was unable to recover HEP and eventually lost traction power as well. The crew performed a hard reset on locomotive E/4615 which was also unsuccessful. Train 355(27) was instructed to hold at Jackson, Michigan, awaiting the disabled train. Alternative transportation was arranged, and two buses were sourced to accommodate the 107 passengers onboard.

By 8:30 PM ET, Amtrak RFE arrived on the scene, and buses were expected to reach the train location between 10:00 PM and 11:00 PM ET due to adverse weather conditions. The Pontiac Mechanical Foreman was dispatched with an estimated arrival of 9:30 PM ET. Local law enforcement was contacted for assistance. Train 355(27), previously holding at Jackson, advanced toward Train 352(27) with plans to couple and push it west to Battle Creek for passenger transfer.

As train 352(27) continued to hold east of Battle Creek without HEP or traction power the crew reported that onboard temperatures remained comfortable and passengers were doing well, although all toilets were full. The local fire department arrived to assist, and school buses were sourced as a precautionary measure.

Two school buses arrived on-site around 1030 PM ET, and with assistance from the fire department, passengers were transferred for transport to Battle Creek. Supplemental buses were arranged to continue service to Pontiac, Michigan, making all scheduled stops. After all passengers were detrained, a total of 87 passengers were transferred to the school buses, while the remaining 20 were moved to Train 355(27) for transport to Battle Creek and subsequent transfer to Train 354(27). The school buses proceeded to Battle Creek to meet supplemental buses.

Combo train set 355/352(27) proceeded west towards Battle Creek, MI and was stopped by the CN PTC desk due to their consist configuration and wasn't allowed onto the CN territory. The CN PTC desk required a lead loco with active PTC. As a result the combo train set performed their run-around move east of Battle Creek, MI at milepost 116, putting 355(27) consist in the lead.

Once the run-around move was complete, the combo train set had issues with E/4615 shutting down. The Pontiac mechanical foreman was on the scene to assist. Eventually they shut down E/4615 entirely to be able to proceed into Battle Creek, MI and ultimately into Chicago.

Due to equipment shortages, Train 353(28) was canceled, and alternative bus transportation was sourced. Train 354(27) turned for train 351(28). Train 351(28) was delayed due to the late arrival of train 354(27)

Train 14(26) - Delay North of Chemult, OR - Freight Train Interference.

27NOV25: Train 14(26) was delayed approximately 56 miles north of Chemult at Wicopee Siding (MP 559.6) on the Cascade Subdivision of Union Pacific Railroad. The delay occurred when Union Pacific freight train ZBRLC-26 (locomotive UPRR 8729) stopped at MP 562.0, blocking the single main track due to binding brake issues. Technicians assisted the freight crew in resolving the problem. Once repairs were completed and the track was cleared, the freight train continued, allowing Train 14(26) to resume its journey to Eugene, OR.

Update: The delay was extended when the ZBRLC-26 crew reached their hours-of-service limit. A replacement crew was dispatched from freight train MPDRV-26 (UPRR 8001) at McCredie Springs to move the train and restore normal operations.

Train 319(27) Summit, IL - Engine Failure

27NOV25: Train 319(17), E/ID4617-7 Cars, was delayed at Summit, IL/MP11.8, on the CNRR Joliet Subdivision, due to engine issues. The Crew contacted CNOC Mechanical to report E/ID4617 was experiencing a "diesel engine major derate" which was causing loading to slow and thus unable to achieve max speed. Siemens, Mechanical, and Transportation Management okayed the train to continue as is to Kansas City as the issue was not a passenger safety concern. Kansas City mechanical would look to resolve the issue on E/ID4617 upon arrival to Kansas City.

Train 4(26) East of Gallup, NM - Broken Rail

27NOV25: Train 4(26) ~~25-FDI-00167 00000005506~~ UNCLASSIFIED 12/17/2025 ~~50.8~~ miles east of Gallup, NM/MP157.5, on the BNSF Gallup Subdivision, at MP107.3 due to a broken rail ahead at MP100.6 to MP100.7. Congestion going east and west built up as a result of the broken rail. Maintenance of Way responded and placed a 10MPH speed restriction through the area. Eastbound BNSF 6090 was the first train to proceed over the rail, followed by BNSF 6589, and then Train 4(26). Train 4(26) had to follow both BNSF 6589 and BNSF 6090 until they were able to get by at Marmon/MP58.8.

Train 59(26) South of Marks, MS - Animal Strike

27NOV25: At 8:24AM-CT, Train 59(26), E/38-7 Cars, went into emergency 23.7 miles south of Marks, MS/MP67.3, on the CNRR Yazoo Subdivision, at MP91.0 due to an animal strike. The Conductor reported striking a dog or small deer which caused a main reservoir hose and brake pipe separation between C/32055 and C/39006. There were no injuries to the crew or 130 passengers onboard. There was no damage to the equipment. Head end power was intermittent while the crew worked in between the cars. Once the hoses were secured and air restored, Train 59(26) was back on the move south at 8:33AM-CT.

Train	Delay	Comment
59(26)	12"	

Train 11(26) Dunsmuir, CA - Car Failure

27NOV25: Train 11(26) was delayed departing Dunsmuir, CA, on UP Black Butte subdivision, due to the HEP cables on C/61004 hanging low and dragging on the rails, causing damage. Due to the damage to the cables HEP was intermittent for approximately 5 minutes until the train reached the Dunsmuir station and then intermittent at the station while the conductor worked to secure the cable. The conductor was able to secure the cable and get the train back on the move and Sacramento, CA mechanical inspected the train upon its arrival.

Train	Delay	Comment
