Operating Highlights

Train 66(18) North of BWI, MD - Trespasser Incident

18SEP26: At approximately 10:44 p.m. train 66(18) operating with engine 603 and 235 customers onboard struck a trespasser north of BWI Airport Rail Station on the Amtrak PW Line near milepost 98.4. The incident occurred in Baltimore County, MD. Head end power remained functional and no injuries were reported by crew or customers onboard. MTA police, Amtrak police, and Amtrak management responded to the scene. Train 50(18) held south of the incident and train 175(18) held in Baltimore station.

Due to the length of time this incident took and the concurring Walk Bridge outage east of New York, train 66(18) was terminated in New York with no alternate New York to Boston and train 65(19) originated New York with no alternate Boston to New York. Two buses were secured from customers making all stops New York to New Haven where customers will then board next available Amtrak at New Haven to operate into Boston.

Train 65(18) West of Kingston, RI - Engine Failure

18SEP26: Train 65(18), operating with engine 629 and carrying 278 customers, came to a stop approximately two miles west of Kingston, RI, on the Amtrak NHB Line at Liberty Interlocking, Milepost 156.8, after experiencing a brake stand safety penalty on engine 629. The crew coordinated with Amtrak management and CNOC Mechanical personnel to troubleshoot and clear the fault; however, the condition repeatedly reoccurred and could not be permanently reset. To facilitate service recovery, Train 179(18), operating with engines 604 and 650 and carrying 398 customers, set off rear engine 650 at Kingston Station for use by Train 65(18). Following the locomotive transfer, Train 179(18) continued its trip with engine 604. Engine 650 was subsequently coupled to Train 65(18), and the required brake tests were successfully performed. Upon completion of testing and verification of proper operation, Train 65(18) resumed westward movement.

Train 52(18) South of Jacksonville, FL - Freight Train Interference

18SEP26: Train 52(18) operating with engine 366 and 269 customers onboard was delayed 6 miles south of Jacksonville, FL on the CSX Sanford subdivision holding at milepost 643.2 meeting CSX I143-17 at control point Beaver Street.

Train 125(18) Metropark, NJ - Pantograph Damage - Engine Failure

18SEP26: Train 125(18) operating with engines 376 and 640, 8 cars and 431 customers onboard was disabled the Metropark, NJ on the Amtrak NYP line due to pantograph damage and downed wires. The temperature was 81 degrees. The customers were discharged at the Metropark station. The customers were accommodated on trains 131(18) and 609(18). There was one minor onboard that was accompanied by a crew member. There was one ADA customer onboard as well. ET and local management responded to the scene.

ET was able to secure the pantograph after removing the damaged part. The equipment was on the move to Philadelphia at 5:10 PM-ET where upon arrival into Philadelphia it was capped with engine 640. Upon departure from Washington D.C. engine 376 displayed a tread warning fault causing the crew to need to shove back to the station and replace the engine with unit number 382. Once the unit was replaced, train 125(18) departed Washington D.C. a second time operating 8 hours and 20 minutes late into Alexandria. Due to the late operation, train 164(19) was delayed departing Newport News, VA.
