Train 69(02) South of Ticonderoga, NY - Signal Delay

02MAY26: Train 69(02) operating with locomotive 132, 5 cars and 62 customers onboard was delayed at MP 99.9 on the CPKC Canadian Subdivision due to a track-occupancy-light. CPKC Speedway dispatcher was unable to allow train 69(02) to proceed until a track foreman verified the route was clear of traffic with an estimated arrival time of 1'00" to the location. The Track-occupancy-light cleared on its own and train 69(02) was able to proceed without any further delays.

CSX Heat Orders

02MAY26: CSX implemented heat-related speed restrictions between 1:00 PM ET and 7:00 PM ET, resulting in lengthy operational delays across multiple subdivisions. Affected subdivisions included: Auburndale, Carters, Lakeland, Sanford Jacksonville Terminal, Lakeland, and Tampa Terminal. These heat orders significantly impacted train velocity and overall service reliability during the affected timeframe.

Train 2248(02) Washington, DC - Car Failure

02MAY26: Train 2248(02) was cancelled due to LVBS failure on Legacy TS-10 at departure time. Due to the ongoing 55 hour outage a replacement set was unable to be moved into position for use for 2248(02).

Train 66(01) Philadelphia, PA - Engine Failure

02MAY26: Train 66(01) operating with locomotive 612, 5 cars and 204 customers was delayed 1 mile East of Philadelphia on the Amtrak New York to Philadelphia Line due to ACSES failure on locomotive 612 requiring the crew to cut out the operating system to allow the train to continue movement. Per operating rule, the train operated at speeds not exceeding 79 mph from their location to New York. Upon arrival into New York locomotive 660 was used to add on top of locomotive 612 to lead movement from New York to Boston.

Upon arrival into New Haven, it was reported locomotive 660 had a bad speedometer requiring the equipment to be capped with locomotive 648. After adding locomotive 648 and performing all the necessary testing and paperwork updates was able to depart New Haven at 10:05 AM-ET.

Train 66(01) was further delayed west of Providence due to cab signal failure on E/648. The crew had to cut out the cab signal system to allow the train to proceed. By rule 556, train 66(01) was capped to a maximum authorized speed of 59 mph for the remainder of the trip.

Train 8(02) Wenatchee, WA - Engine Failure

03MAY26: At approximately 10:20 PM PT, Train 8(02), operating with locomotive E/302, six cars, and 110 customers onboard, was delayed approximately 4 miles west of Wenatchee, WA Station, at MP 1653.82 on the BNSF Scenic Subdivision, after the locomotive shut down due to a low hydrostatic oil fault, resulting in a loss of head-end power (HEP). Weather conditions at the time were reported as 68°F and clear.

A passing BNSF coal train assisted by shoving Train 8(02) into Wenatchee Station, where it arrived at approximately 10:20 PM PT. While the crew inspected the locomotive, BNSF freight locomotive 6851, operating on a vehicle train located at Albus Siding approximately 25 miles east, was identified and arranged to be leased as a rescue unit. Simultaneously, the inbound engineer procured six containers of 30-weight oil, which were added to the locomotive. Following the oil refill, the locomotive was successfully restarted, and head-end power was restored at approximately 11:05 PM PT, with 115 customers onboard at that time.

Once the rescue locomotive was added to the consist and all required testing was completed, Train 8(02) was released and departed Wenatchee at approximately 11:55 PM PT, continuing its trip.

03MAY26: Train 28(02), carrying 73 customers onboard, was delayed east of Pasco, WA, at MP 108.5 on the BNSF Lakeside Subdivision, due to a disabled freight train ahead. BNSF freight train G-FRMTAC9-27H experienced an undesired emergency brake application, blocking the route. A BNSF Trainmaster responded to the scene, and an additional freight crew in the area assisted with recovery efforts. Once the DP unit was restarted, air was recovered, and the freight train was cleared from the main track, Train 28(02) was released and continued its eastbound trip.

Train 765(02) San Diego, CA - Flat Spots

02MAY26: Train 765(02) 26-FOI-00478 500005006989 "UNCLASSIFIED" stopped 0.1 miles west of San Diego, CA (MP 267.5) on the NCTD San Diego Subdivision, at MP 267.4, to inspect cab car C6952 for suspected wheel flat spots. San Diego Mechanical responded and determined that the flat spots were condemnable. As a result, Train 567(02) was cancelled in its entirety, and its equipment was moved forward to represent Train 765(02). All customers originally ticketed on the cancelled Train 567(02) were reaccommodated onto Train 765(02). Following completion of the equipment swap and boarding, Train 765(02) departed San Diego at 7:43 AM PT, operating 1 hour and 42 minutes late.

Due to the flat spots and the same equipment having operated the previous evening on Train 588(01), NCTD implemented a temporary speed restriction on the San Diego Subdivision, effective from San Diego to Songs, MP 209.16. Metrolink also placed a temporary speed restriction on their territory and tracks in which Train 588(01) operated. During this period, all trains were required to operate at restricted speed through the affected territory pending completion of a full rail inspection by an NCTD Track Inspector and Metrolink track inspector. As a result of this restriction, extensive delays occurred to Amtrak Pacific Surfliner service operating through the area. The restriction remained in effect until the inspection was completed and track conditions were confirmed safe for normal operations. At 11:10A, all NCTD tracks were inspected and cleared for normal operation.

Train 765(02) was further delayed at MP 209.4, going from NCTD territory to Metrolink territory due to PTC issues. The crew held at location while troubleshooting with Metrolink and Amtrak PTC desks. Unable to resolve issue, the crew cut out PTC and continued west.

Train 769(02) was further delayed holding behind Train 765(02) while they worked to resolve PTC issues. Due to the late operation, Train 769(02) terminated in Santa Barbara, CA with alternate bus transportation from Santa Barbara to Goleta, CA. Train 790(02) originated in Santa Barbara with alternate bus transportation from Goleta to Santa Barbara.

Train 572(02) was delayed departing Los Angeles, CA due to PTC issues. The crew contacted the PTC desk to troubleshoot. Once issue was resolved, Train 572(02) departed Los Angeles.

Train 777(02) was delayed departing San Diego, CA due to the late equipment turn from 564(02) arriving at 12:05P, 1 hour and 58 minutes late.

Train 794(02) was delayed departing San Luis Obispo, CA due to late equipment turn and PTC issues from 765(02).
