Train 2150(26) East of Mystic, CT - Engine Failure

26OCT26: Train 2150(26) with Nextgen set 23, PC/2121, PC/2123, and 358 customers was stopped four miles east of Mystic at Walkers Dock/MP 136.6 with multiple faults, a loss of head end power, and no radio communications. An Amtrak Road Foreman assisted the crew via phone. Due to the condition of the equipment it was necessary for the crew to de-prepare. The crew was unable to de-prepare. The batteries were reported dead on the equipment. An Amtrak Road Foreman and Trainmaster responded to the scene to assist the crew. Due to train 2150(26) stopped on a single track area no trains were able to operate through. Train 1135(26) was held at High Street/MP 142.9 until the route was clear. Trains 1165(26), 1167(26) , and 67(26) were held at Kingston station/MP 158.1. Train 2148(26) was held at New London station/MP 122.9.

Diesel E/119 was added to train 1167(26) in Boston to support the initial rescue plan, but was later removed at New Haven. Train 486(26) was cancelled due to wires down on Metro North territory and this equipment with E/87 was used to rescue train 2150(26) and move the disabled equipment to New London where the train was terminated. All customers from train 2150(26) were accommodated on trains 2148(26), 1194(26), 1082(26), and 1088(26) at New London. The shuttle equipment was cut from 2150(26) and returned to New Haven. Boston dispatched E/130, C/81543, and E/604 to rescue and deadhead 2150(26) equipment to Boston.

Once train 2150(26) was rescued by the Springfield shuttle set and cleared into New London, train 2148(26) continued east followed by 1135(26), 1165(26), 1167(26), and 67(26) fleeting west. Train 1194(26) advanced to New London and held for west bound traffic to clear before continuing. Trains 1082(26) and 1088(26) were held at Old Saybrook due to the crews on hours of service and holding for relief crews delivered on train 1165(26). Train 1168(26) was held behind train 1088(26) at Old Saybrook. Once the relief crews were on board and west bound traffic was clear, train traffic continued east.

27OCT26: Train 1167(26) arrived Philadelphia at 320AM-ET, 4 hours, and 45 minutes late. As a result, train 1150(27) was estimated to depart Philadelphia up to 1 hour late due to the late turn of this equipment.

Train 2148(26) East of New Haven, CT - Engine Failure

26OCT26: Train 2148(26) with Nextgen set 24, PC/2148, PC/2145, and 321 customers was stopped on the New Haven to Boston Main line at MP 77.74 with a report of a broken pantograph. After further inspection it was found to be a broken carbon strip and the pantograph was in the cradle position. The crew was reconfiguring and de-preparing the train to proceed. The HEP was down intermittently for approximately 45 minutes while the crew worked to de-prepare.

After 2148(26) was back on the move, ET inspected the area and reported a steady wire down across all 4 tracks west of Division Post on the Metro North side. Metro North reported that tracks 1, 2 and 4 were ok for Diesel moves only. A shuttle set was readied in the event it was necessary to tow equipment through the area. Train 1087(26) was held at Old Saybrook and 486(26) was held in New Haven for disposition. Trains 1082(26), 1088(26), and 1194(26) were also delayed in New Haven holding for repairs to be complete. Trains 479(26), 486(26), 474(26), and 417(26) were cancelled in their entirety. Service Recovery was implemented on all trains involved. Once the repairs were complete and power was restored, train traffic continued.

Due to paperwork issues, train 1087(26) cut E/615 at New Haven and replaced with E/669. Train 1087(26) departed New Haven at 829PM-ET, 7 hours, and 59 minutes late. Due to late operation, train 1087(26) was terminated at Washington with one bus secured for alternate transportation between Washington and Norfolk. As a result, train 1138(27) originated at Washington with two buses secured as alternate transportation.

Train 21/421(25) - Freight Train Interference

26OCT26: Train 21/421(25), with 193 customers, was delayed at Morgan/MP288, 28 miles south of Cleburne, TX, on the BNSF Fort Worth Subdivision, due to BNSF 6906 struck a vehicle ahead at MP275. Local authorities, BNSF trainmaster and mechanical responded to the scene. Train 21/421(25) was delayed holding for completion of the investigation and track inspection and for open route ahead.

Once the route opened, train 21/421(25) met BNSF freights 9006 and 8278, and then followed BNSF 6906 to McGregor, TX/MP243.5 and found a route around.

Union Pacific Railroad ordered train 21/421(25) to stop at Taylor, TX/MP144.5 because their scheduled signal suspension had already begun. Due to the loss of the route south for twelve hours, the following service adjustment was put into effect:

-Train 21/421(25) terminated at Taylor, TX.
-Four buses were secured to take customers and crew to San Antonio, TX making all stops.
-UP pilots were secured to wye the equipment in Taylor yard.
-Train 1(26) held at San Antonio to take the 422 equipment off 2/422(25).
-Once 1(26)/421(25) was made up complete, customers off the buses boarded and the train departed San Antonio.
-Four buses were secured to take the 22(27)/422(25) customers and crew to Taylor, TX making all stops.

BNSF Gallup Subdivision East of Winslow, AZ- Southwest Chief Service Disruption

23OCT26: A severe storm with isolated showers and thunderstorms impacted the area between Gallup, NM and Albuquerque, NM bringing flash floods and reduced operating conditions. At 9:50A-PT, the BNSF reported flash floods on the Gallup Subdivision with confirmed water over the rails at MP 77.9, 80 miles east of Gallup, NM . Multiple freights were tied down with crews expired on hours of service between Laguna/MP 71.1 and Grants/MP 98.3 causing single tracking conditions over 100 miles. BNSF maintenance of way personnel responded to areas of potential water of the rails to inspect. Substantial delays were incurred operating through the affected area.

Train 4(22), with 159 customers on board, arrived into Winslow, AZ at 9:42A-PT and held for open track. While holding in Winslow, and in anticipation of further delay, the crew performed a calendar day inspection. Once a route was open, Train 4(22) proceeded east incurring further delay at MP 253.4, holding for the recrew to arrive and conduct a job briefing. Upon completion of their job briefing, Train 4(22) proceeded east.

Train 3(22) was also delayed operating through the affected area by high winds, flash

holding in Flagstaff, AZ. Train 3(22) held at Flagstaff with pilots on board beginning at 1:55A-PT for the recrew to arrive from Train 4(23), arriving at approximately 4:30A-PT. Once the recrew arrived and conducted their job briefing, Train 3(22) proceeded west.

To support customers and provide service recovery on Train 4(22), complimentary food and beverage offerings were provided. All coach customers received complimentary snack packs, bottled water, and hot beverages. During lunch service, sleeping car customers received the regular lunch service in the Dining Car, while coach customers were provided complimentary beef stew, mashed potatoes, and beverages. During dinner service, sleeping car customers received the regular dinner service in the Dining Car, while coach customers were provided complimentary Salisbury steak, vegetables, and mashed potatoes.

Train 4(22) had five misconnections at Kansas City, MO to Train 318(24) that were provided an alternate bus to their final destination. Train 6(22) also provided aid to local customers on Train 4(22) that were boarding between Galesburg and Chicago.

24OCT26: Train 3(23), operating with engines 79/29, 9 coaches, and 153 customers, was stopped east of the Gallup, NM station due to severe weather resulting in water above the rail in multiple locations. Burlington Northern Santa Fe subsequently reported that there was no route available beyond Laguna (MP 71) due to flooding of the tracks and the adjacent highway. Reported flood damage included both main tracks under water with debris between MP 72.7 and MP 72.3, including approximately 800 feet of side scour on the Main Track 1 side; side scour and undercutting at a culvert near MP 72.4; water over a high-water detector bridge and both rails between MP 70.1 and MP 69.8; and water over both rails between MP 69.8 and MP 69.7, where inspection was not possible. As a result, Train 3(23) shoved back to Albuquerque, NM and arrived at 11:57P-MT. The train wye'd en route into the station and will return to its origin.

As a result of the service disruption, the following service adjustments were implemented:
- Train 3(23) arrived at Albuquerque, NM at 11:57P-MT, wyed enroute into the station, and operated back to Chicago, IL, returning customers to points of origination.
- Train 4(24), with 135 customers, wyed at Barstow, CA and operated back to Los Angeles, CA Union Station.
- Train 3(24), with 136 customers, reversed back to Kansas City, MO, wyed, and planned to return to its origin.
Due to crew availability in Kansas City, Train 3(24) held in Kansas City for the arrival of Train 4(23) and was coupled to operate as a combo set to Chicago, returning Train 3(24) customers to points of origination.
- Train 4(25) was canceled. No alternate transportation was provided.

25OCT26: Train 3(23) departed Albuquerque, NM, at 125AM-MT operating eastward back to Chicago. Train 3(23) was delayed at Fox/MP820.0, 15 miles east of Lamy, NM, on the BNSF Glorieta Subdivision, after operating through code line failure at E. Fox, the crew reported while operating through the switch, with it on hand, the switch handle popped up as train started into the switch. Train 3(23) was delayed due to possible switch damage and due to holding for a required recrew to arrive.

As of 700AM-CT on Sunday October 25th, BNSF reported still no estimate for open track. Due to the ongoing issues on the BNSF Gallup Subdivision, additional Southwest Chief service adjustments were necessary:
- Train 3(25) terminated in Kansas City, MO. No alternate transportation between Kansas City and Los Angeles.
- Train 4(25) was reinstated between Kansas City and Chicago only. Train 4(25) originated in Kansas City with no alternate transportation between Los Angeles and Kansas City.
- Train 4(27) cancelled entirely. No alternate transportation between Los Angeles and Chicago.

26OCT26: BNSF reported current weather conditions and further soil and ground degradation and scouring have delayed necessary repairs and pushed back track opening. Main Track 1 estimated back 300PM-MT Monday October 26th and No 2 estimated back at

Angeles.
- Train 4(26) cancelled entirely, no alternate transportation between Los Angeles and Chicago.
BNSF advised an extremely large volume of freight traffic has been holding for open route and expect it to be heavily congested across the subdivision upon track opening.

27OCT26: A revised Main Track 1 estimate has been changed to "pending" due to a new washout that was identified at Milepost 50.2, with approximately 500 feet of side scour (erosion of the soil, rock, or ballast along the side of the railroad embankment (roadbed) caused by flowing water). Repair efforts are underway, with a ballast train placing material. Main Track Two between Laguna and Marmon is expected to reopen at 12:01 AM CT on the 27th under a 10 MPH speed restriction. BNSF has advised there are still a significant amount of Freight Trains tied down which will cause significant congestion through the area. Restoration efforts remain fluid due to changing water levels along the right-of-way.

- Train 3 (27) has been canceled in its entirety between Chicago and Los Angeles. No alternate transportation will be provided.

UPRR Santa Barbara Subdivision North of Goleta, CA- Track and Time Authority

16OCT26: The UPRR placed general orders in effect beginning October 16th at 7:00A-PT instituting track and time authority on approximately 61 miles of territory on the Santa Barbara Subdivision between CO295, 4 miles north of Lompoc-Surf Station, and CO356, 2 miles north of Goleta, CA. Multiple trains were delayed operating through the affected area due to signal issues where crews operated at restricted speed and stopped to flag crossings.

17OCT26: In order to minimize customer delays due to this, the following Service Adjustments were implemented:

Train 761(17) and 765(17) were originated at Los Angeles, CA, no alternate transportation provided.
Trains 757/ 765/ 777(17-01NOV) Terminated Goleta, CA with alternate bus transportation provided to San Luis Obispo, CA.
Trains 774/ 786/ 794(17-01NOV) Originated Goleta, CA with alternate bus transportation provided from San Luis Obispo, CA.
Three busses were secured to operate each route, and did not make the Lompoc-Surf, CA station stop.

23OCT26: The operating plan was extended through at least Sunday November 1, with further extensions anticipated.

Pacific Surfliners San Clemente Pier, CA - High Tide Affecting Track Indication

17OCT26: Pacific Surfliner service experienced delays due to high-tide conditions affecting the NCTD San Diego Subdivision starting at Don/MP 216.38, 12 miles east of San Clemente Pier, to Serra/MP 199.9, 5 miles west. The high tides caused track indication failures, requiring trains to flag through the affected area at restricted speed. Single-track operations between MP 216.8 and MP 199.9 contributed to additional train meets and cascading delays throughout the corridor.

Due to late Pacific Surfliner operations, the following additional service adjustments

-Train 593(17) was canceled, with customers accommodated on Train 595(17).

18OCT26: Pacific Surfliner service continued to experienced delays due to ongoing signal issues and train interference. Trains were expected to receive up to an hour and 30 minutes of delay.

Due to late Pacific Surfliner operations, the following additional service adjustments were implemented:

-Train 786(18) was terminated at Los Angeles, CA, with customers accommodated on the next available service Train 588(18).
-Train 593(18) was canceled, with customers accommodated on Train 595(18).

19OCT26: Pacific Surfliner service continued to experienced delays due to ongoing signal issues and train interference. Trains were expected to receive up to an hour and 30 minutes of delay. Impacts are expected to continue until further notice.
