Train 1163(30) North of Baltimore, MD - Car Failure

30OCT26: At 7:10 p.m. train 1163(30) operating with engines 636 and 536 customers onboard stopped 2 miles north of Baltimore, MD on the Amtrak PW Line at Biddle interlocking milepost 93 to inspect equipment after coach 82724 and 82646 had residual smoke from water leaking on an open connector within the equipment. The local fire department was on scene and an AC hold was placed on track 2 and 3 while headend power was brought down so all parties could safely navigate the equipment. A track hold was placed in the area from Biddle to Point interlocking. The local fire department released their hold along with APD and ET allowing the train to continue dark into Baltimore. Upon arrival at Baltimore Penn station, mechanical met the train to further inspect the equipment. The train operated dark into Washington D.C. to ensure no further issues would arise from the electrical hazard onboard.

Multiple Trains - Amtrak PH Line- Hold On All Tracks Structure Fire

30OCT26: 3:00 pm-et a right-of-way structure fire adjacent to the mainline near Middletown, PA resulted in the closure of all tracks on the Amtrak PH Line and required the catenary to be de-energized. Local fire department personnel responded and extinguished the fire. One hose line remained across the tracks while inspections were conducted, and Amtrak Police and local emergency responders coordinated activities at the scene. No injuries were reported. Following fire department clearance and completion of catenary and track inspections, normal operations resumed.

As a result of the incident, Train 645(30), with 48 customers, terminated at Elizabethtown, PA, and its equipment was turned to originate Train 652(30) from Elizabethtown, PA. Train 609(30) and Train 647(30) terminated at Lancaster, PA, while Train 654(30) and Train 656(30) originated from Lancaster, PA. Customers on Trains 645(30), 652(30), 656(30), and 626(30) were fare protected. Bus transportation was arranged for customers at Elizabethtown, PA and between Harrisburg, PA and Lancaster, PA as needed. Equipment and crew assignments were adjusted to support the revised operating plan, and affected customers and train crews were notified of the service modifications.

Train 1195(30) North of Baltimore, MD - Engine Failure

30OCT26: Train 1195(30) operating with locomotive 619, 8 cars and 454 customers became disabled at MP 83.9 on the Amtrak PW Line due to a seized parking brake on locomotive 619. The crew working with CNOC Mechanical made multiple attempts to free the parking brake with no success and the train remained with functional HEP throughout the duration of the delay. The decision was made to terminate train 1195(30) at its location. A passenger transfer to deadhead MARC 679 was made for all 454 customers to continue travel to Washington making all scheduled station stops. KW908 crew and a rescue diesel were dispatched out of Odenton to rescue the equipment and bring to equipment back to Washington for repair and disposition. An adjustment was made in Washington to move up a set to operate train 1142(30) with an on-time departure.

As a result of train 1195(30) becoming disabled and reducing track use in the affected are, multiple other trains were delays due to routing limitations.

Train 73(30) North of Salisbury, NC - Freight Train Interference

30OCT26: Train 73(30) operating with locomotives NC1755-6 cars and 105 customers was delayed 1 mile North of Salisbury, NC due to freight train interference. Train 73(30) had mobility impaired customers who required the train to work track No.2, as a result train 73(30) had to cross over to track No.1 and hold for NS E38 and 24R to pass. Once the freights were clear of track No.2, train 73(30) was able to reverse back onto track No.2 and proceed to occupy Salisbury Station on complete their station work.

As a result of the late operation of train 73(30) the turn of equipment to train 74(30) at Charlotte resulted in an initial terminal delay.

Train 682(30) Brunswick, ME - PTC Failure

27-FOI-00101 00000009044 "UNCLASSIFIED" 11/2/2026

30OCT26: train 682(30) operating with locomotives 3099, [illegible]s and NPCU 90224 in lead was delayed immediately after departing Brunswick Station due to IETMS Failure on NPCU 90224. The crew worked with the CSX Help Desk and were able to get the system to resume operation and proceed towards Freeport. The crew reported additional occurrences of the IETMS system becoming disengaged. CSX authorized train 682(3.0) to continue as a failed train with a maximum authorized speed of 59 mph until reaching ACSES territory at State Line Massachusetts causing additional delay to the train.

Train 370(30) Bangor, MI - Freight Train Interference

31OCT26: Train 370(30), operating with engine 4626, 4 coaches, and 113 customers, was delayed departing Bangor, MI, on CSX Grand Rapids subdivision, due to a disabled CSX freight train with a broken knuckle ahead of them with no route around. CSX MTO responded to assist and a recrew for the freight was on duty at 9:15pm-et.

When the CSX train was repaired train 370(30) departed Bangor, MI, and came to a stop again due to the freight unable to make the grade ahead of them. As a result train 370(30) was required to shove back 2 miles to clear the interlocking to allow room for the disabled freight to then shove back and clear passed 370(30). Once the freight cleared the interlocking a route was then made available for train 370(30).

BNSF Gallup Subdivision East of Winslow, AZ- Southwest Chief Service Disruption

23OCT26: A severe storm with isolated showers and thunderstorms impacted the area between Gallup, NM and Albuquerque, NM bringing flash floods and reduced operating conditions. At 9:50A-PT, the BNSF reported flash floods on the Gallup Subdivision with confirmed water over the rails at MP 77.9, 80 miles east of Gallup, NM . Multiple freights were tied down with crews expired on hours of service between Laguna/MP 71.1 and Grants/MP 98.3 causing single tracking conditions over 100 miles. BNSF maintenance of way personnel responded to areas of potential water of the rails to inspect. Substantial delays were incurred operating through the affected area.

Train 4(22), with 159 customers on board, arrived into Winslow, AZ at 9:42A-PT and held for open track. While holding in Winslow, and in anticipation of further delay, the crew performed a calendar day inspection. Once a route was open, Train 4(22) proceeded east incurring further delay at MP 253.4, holding for the recrew to arrive and conduct a job briefing. Upon completion of their job briefing, Train 4(22) proceeded east.

Train 3(22) was also delayed operating through the affected area by high winds, flash floods, and freight meets.

24OCT26: Due to the late operation of Train 3(22), the crew expired on hours of service holding in Flagstaff, AZ. Train 3(22) held at Flagstaff with pilots on board beginning

27-FOI-00101 00000009044 "UNCLASSIFIED" 1/2/2026

To support customers and provide service recovery on Train 4(22), complimentary food and beverage offerings were provided. All coach customers received complimentary snack packs, bottled water, and hot beverages. During lunch service, sleeping car customers received the regular lunch service in the Dining Car, while coach customers were provided complimentary beef stew, mashed potatoes, and beverages. During dinner service, sleeping car customers received the regular dinner service in the Dining Car, while coach customers were provided complimentary Salisbury steak, vegetables, and mashed potatoes.

Train 4(22) had five misconnections at Kansas City, MO to Train 318(24) that were provided an alternate bus to their final destination. Train 6(22) also provided aid to local customers on Train 4(22) that were boarding between Galesburg and Chicago.

24OCT26: Train 3(23), operating with engines 79/29, 9 coaches, and 153 customers, was stopped east of the Gallup, NM station due to severe weather resulting in water above the rail in multiple locations. Burlington Northern Santa Fe subsequently reported that there was no route available beyond Laguna (MP 71) due to flooding of the tracks and the adjacent highway. Reported flood damage included both main tracks under water with debris between MP 72.7 and MP 72.3, including approximately 800 feet of side scour on the Main Track 1 side; side scour and undercutting at a culvert near MP 72.4; water over a high-water detector bridge and both rails between MP 70.1 and MP 69.8; and water over both rails between MP 69.8 and MP 69.7, where inspection was not possible. As a result, Train 3(23) shoved back to Albuquerque, NM and arrived at 11:57P-MT. The train wye'd en route into the station and will return to its origin.

As a result of the service disruption, the following service adjustments were implemented:
- Train 3(23) arrived at Albuquerque, NM at 11:57P-MT, wyed enroute into the station, and operated back to Chicago, IL, returning customers to points of origination.
- Train 4(24), with 135 customers, wyed at Barstow, CA and operated back to Los Angeles, CA Union Station.
- Train 3(24), with 136 customers, reversed back to Kansas City, MO, wyed, and planned to return to its origin.

Due to crew availability in Kansas City, Train 3(24) held in Kansas City for the arrival of Train 4(23) and was coupled to operate as a combo set to Chicago, returning Train 3(24) customers to points of origination.
- Train 4(25) was canceled. No alternate transportation was provided.

25OCT26: Train 3(23) departed Albuquerque, NM, at 125AM-MT operating eastward back to Chicago. Train 3(23) was delayed at Fox/MP820.0, 15 miles east of Lamy, NM, on the BNSF Glorieta Subdivision, after operating through code line failure at E. Fox, the crew reported while operating through the switch, with it on hand, the switch handle popped up as train started into the switch. Train 3(23) was delayed due to possible switch damage and due to holding for a required recrew to arrive.

As of 700AM-CT on Sunday October 25th, BNSF reported still no estimate for open track. Due to the ongoing issues on the BNSF Gallup Subdivision, additional Southwest Chief service adjustments were necessary:
- Train 3(25) terminated in Kansas City, MO. No alternate transportation between Kansas City and Los Angeles.
- Train 4(25) was reinstated between Kansas City and Chicago only. Train 4(25) originated in Kansas City with no alternate transportation between Los Angeles and Kansas City.
- Train 4(27) cancelled entirely. No alternate transportation between Los Angeles and Chicago.

26OCT26: BNSF reported current weather conditions and further soil and ground degradation and scouring have delayed necessary repairs and pushed back track opening. Main Track 1 estimated back 300PM-MT Monday October 26th and No 2 estimated back at 1201AM-MT Tuesday October 27th. Due to the ongoing issues on the BNSF Gallup subdivision the following additional service adjustments were necessary:
- Train 3(26) cancelled entirely, no alternate transportation between Chicago and Los Angeles.
- Train 4(26) cancelled entirely, no alternate transportation between Los Angeles and

27OCT26: A revised Main Track 1 estimate has been changed to "pending" due to a new washout that was identified at Milepost 50.2, with approximately 500 feet of side scour (erosion of the soil, rock, or ballast along the side of the railroad embankment (roadbed) caused by flowing water). Repair efforts are underway, with a ballast train placing material. Main Track Two between Laguna and Marmon is expected to reopen at 12:01 AM CT on the 27th under a 10 MPH speed restriction. BNSF has advised there are still a significant amount of Freight Trains tied down which will cause significant congestion through the area. Restoration efforts remain fluid due to changing water levels along the right-of-way.

27-FOI-00191 000000090044 "UNCLASSIFIED" 11/2/2026

- Train 3 (27) canceled in its entirety between Chicago and Los Angeles. No alternate transportation will be provided.
- Train 4(28) cancelled entirely, no alternate transportation between Los Angeles and Chicago.

29OCT26: Trains 3 and 4 continued to see heavy delays in the area due to ongoing repairs and congestion. BNSF advised to expect delays between 2 to 4 hours to continue over the next several days.

UPRR Santa Barbara Subdivision North of Goleta, CA- Track and Time Authority

27-POI-00101 00000009044 "UNCLASSIFIED" 11/2/2026

16OCT26: The UPRR placed numerous orders in effect beginning October 16th at 7:00A-PT instituting track and time authority on approximately 61 miles of territory on the Santa Barbara Subdivision between CO295, 4 miles north of Lompoc-Surf Station, and CO356, 2 miles north of Goleta, CA. Multiple trains were delayed operating through the affected area due to signal issues where crews operated at restricted speed and stopped to flag crossings.

17OCT26: In order to minimize customer delays due to this, the following Service Adjustments were implemented:

Train 761(17) and 765(17) were originated at Los Angeles, CA, no alternate transportation provided.
Trains 757/ 765/ 777(17-01NOV) Terminated Goleta, CA with alternate bus transportation provided to San Luis Obispo, CA.
Trains 774/ 786/ 794(17-01NOV) Originated Goleta, CA with alternate bus transportation provided from San Luis Obispo, CA.
Three busses were secured to operate each route, and did not make the Lompoc-Surf, CA station stop.

23OCT26: The operating plan was extended through at least Sunday November 1.

30OCT26: The operating plan was extended to Friday November 6th.
