Train 4(29) West of Naperville, IL - Metrolink Cars Set Out

31OCT26: Train 4(29), with engines 40 and 179, 10 Amtrak cars, Metrolink cars SC189 and SC198, and 234 customers onboard, was ordered to stop by the BNSF dispatcher at mile post 70.1, 42 miles west of Naperville, IL/MP28.5, due to a wayside hot bearing indication on the car SC198. The crew checked the temperature of the bearing and determined it was about 204 degrees. BNSF ordered the car be set out at Somonauk, IL/MP57.8 on the 7701 Somonauk storage track on the BNSF Mendota subdivision. Requests to allow the equipment to continue to Chicago were denied. Train 4(29) was ordered to advance 10 miles to Somonauk at 10MPH. Upon arrival, the crew requested and was granted permission to set out both Metrolink SC198 and SC189, citing concerns over having additional issues downline. After setting out the cars, train 4(29) reported a switch issue preventing the equipment from shoving back into the siding. Once the equipment was made up complete, and a brake test was performed, train 4(29) continued east. Metrolink chief was notified.

BNSF Gallup Subdivision East of Winslow, AZ- Southwest Chief Service Disruption

23OCT26: A severe storm with isolated showers and thunderstorms impacted the area between Gallup, NM and Albuquerque, NM bringing flash floods and reduced operating conditions. At 9:50A-PT, the BNSF reported flash floods on the Gallup Subdivision with confirmed water over the rails at MP 77.9, 80 miles east of Gallup, NM . Multiple freights were tied down with crews expired on hours of service between Laguna/MP 71.1 and Grants/MP 98.3 causing single tracking conditions over 100 miles. BNSF maintenance of way personnel responded to areas of potential water of the rails to inspect. Substantial delays were incurred operating through the affected area.

Train 4(22), with 159 customers on board, arrived into Winslow, AZ at 9:42A-PT and held for open track. While holding in Winslow, and in anticipation of further delay, the crew performed a calendar day inspection. Once a route was open, Train 4(22) proceeded east incurring further delay at MP 253.4, holding for the recrew to arrive and conduct a job briefing. Upon completion of their job briefing, Train 4(22) proceeded east.

Train 3(22) was also delayed operating through the affected area by high winds, flash floods, and freight meets.

24OCT26: Due to the late operation of Train 3(22), the crew expired on hours of service holding in Flagstaff, AZ. Train 3(22) held at Flagstaff with pilots on board beginning at 1:55A-PT for the recrew to arrive from Train 4(23), arriving at approximately 4:30A-PT. Once the recrew arrived and conducted their job briefing, Train 3(22) proceeded west.

To support customers and provide service recovery on Train 4(22), complimentary food and beverage offerings were provided. All coach customers received complimentary snack packs, bottled water, and hot beverages. During lunch service, sleeping car customers received the regular lunch service in the Dining Car, while coach customers were provided complimentary beef stew, mashed potatoes, and beverages. During dinner service, sleeping car customers received the regular dinner service in the Dining Car, while coach customers were provided complimentary Salisbury steak, vegetables, and mashed potatoes.

24OCT26: Train 3(23), operating with engines 79/29, 9 coaches, and 153 customers, was stopped east of the Gallup, NM station due to severe weather resulting in water above the rail in multiple locations. Burlington Northern Santa Fe subsequently reported that there was no route available beyond Laguna (A F Tf) due to flooding of the tracks and the adjacent highway. Reported flood damage included both main tracks under water with debris between MP 72.7 and MP 72.3, including approximately 800 feet of side scour on the Main Track 1 side; side scour and undercutting at a culvert near MP 72.4; water over a high-water detector bridge and both rails between MP 70.1 and MP 69.8; and water over both rails between MP 69.8 and MP 69.7, where inspection was not possible. As a result, Train 3(23) shoved back to Albuquerque, NM and arrived at 11:57P-MT. The train wye'd en route into the station and will return to its origin.

27-FOI-00101 00000009045 "UNCLASSIFIED" 11/2/2026

As a result of the service disruption, the following service adjustments were implemented:
- Train 3(23) arrived at Albuquerque, NM at 11:57P-MT, wyed enroute into the station, and operated back to Chicago, IL, returning customers to points of origination.
- Train 4(24), with 135 customers, wyed at Barstow, CA and operated back to Los Angeles, CA Union Station.
- Train 3(24), with 136 customers, reversed back to Kansas City, MO, wyed, and planned to return to its origin.

Due to crew availability in Kansas City, Train 3(24) held in Kansas City for the arrival of Train 4(23) and was coupled to operate as a combo set to Chicago, returning Train 3(24) customers to points of origination.
- Train 4(25) was canceled. No alternate transportation was provided.

25OCT26: Train 3(23) departed Albuquerque, NM, at 125AM-MT operating eastward back to Chicago. Train 3(23) was delayed at Fox/MP820.0, 15 miles east of Lamy, NM, on the BNSF Glorieta Subdivision, after operating through code line failure at E. Fox, the crew reported while operating through the switch, with it on hand, the switch handle popped up as train started into the switch. Train 3(23) was delayed due to possible switch damage and due to holding for a required recrew to arrive.

As of 700AM-CT on Sunday October 25th, BNSF reported still no estimate for open track. Due to the ongoing issues on the BNSF Gallup Subdivision, additional Southwest Chief service adjustments were necessary:
- Train 3(25) terminated in Kansas City, MO. No alternate transportation between Kansas City and Los Angeles.
- Train 4(25) was reinstated between Kansas City and Chicago only. Train 4(25) originated in Kansas City with no alternate transportation between Los Angeles and Kansas City.
- Train 4(27) cancelled entirely. No alternate transportation between Los Angeles and Chicago.

26OCT26: BNSF reported current weather conditions and further soil and ground degradation and scouring have delayed necessary repairs and pushed back track opening. Main Track 1 estimated back 300PM-MT Monday October 26th and No 2 estimated back at 1201AM-MT Tuesday October 27th. Due to the ongoing issues on the BNSF Gallup subdivision the following additional service adjustments were necessary:
- Train 3(26) cancelled entirely, no alternate transportation between Chicago and Los Angeles.
- Train 4(26) cancelled entirely, no alternate transportation between Los Angeles and Chicago.

BNSF advised an extremely large volume of freight traffic has been holding for open route and expect it to be heavily congested across the subdivision upon track opening.

27OCT26: A revised Main Track 1 estimate has been changed to "pending" due to a new washout that was identified at Milepost 50.2, with approximately 500 feet of side scour (erosion of the soil, rock, or ballast along the side of the railroad embankment (roadbed) caused by flowing water). Repair efforts are underway, with a ballast train placing material. Main Track Two between Laguna and Marmon is expected to reopen at 12:01 AM CT on the 27th under a 10 MPH speed restriction. BNSF has advised there are still a significant amount of Freight Trains tied down which will cause significant congestion through the area. Restoration efforts remain fluid due to changing water

- Train 4(28) cancelled entirely, no alternate transportation between Los Angeles and Chicago.

29OCT26: Trains 3 and 4 continued to see heavy delays in the area due to ongoing repairs and congestion. BNSF advised to expect delays between 2 to 4 hours to continue over the next several days.

UPRR Santa Barbara Subdivision North of Goleta, CA- Track and Time Authority

27-POI-00101 00000009046 "UNCLASSIFIED" 11/2/2026

16OCT26: The UPRR placed engineering crews in effect beginning October 16th at 7:00A-PT instituting track and time authority on approximately 61 miles of territory on the Santa Barbara Subdivision between CO295, 4 miles north of Lompoc-Surf Station, and CO356, 2 miles north of Goleta, CA. Multiple trains were delayed operating through the affected area due to signal issues where crews operated at restricted speed and stopped to flag crossings.

17OCT26: In order to minimize customer delays due to this, the following Service Adjustments were implemented:

Train 761(17) and 765(17) were originated at Los Angeles, CA, no alternate transportation provided.
Trains 757/ 765/ 777(17-01NOV) Terminated Goleta, CA with alternate bus transportation provided to San Luis Obispo, CA.
Trains 774/ 786/ 794(17-01NOV) Originated Goleta, CA with alternate bus transportation provided from San Luis Obispo, CA.
Three busses were secured to operate each route, and did not make the Lompoc-Surf, CA station stop.

23OCT26: The operating plan was extended through at least Sunday November 1.

30OCT26: The operating plan was extended to Friday November 6th.
