Operating Highlights

Train 99(20) - Richmond, VA - Vehicle Strike

20SEP26: 7:55pm Train 99(20) with E/385, plus 8 cars, carrying 285 passengers, struck an unoccupied vehicle at MP 1.23 on the CSX Bellwood Subdivision, DOT Crossing# 623530L, Hospital Street/7th Street North in the City of Richmond, Richmond City County, VA. There were no reported injuries to crew or passengers. The vehicle was reported to be unoccupied/sole occupant ok. The vehicle wound up wedged between the lead engine and an embankment and required a tow truck to remove it. The weather at the time of the incident was 74° and cloudy. The grade crossing was designated with pavement markings, automated gate arms and mast mounted flashing lights - all of which were functional at the time of the incident.

Richmond Police Department and EMS responded. Amtrak Road Foreman Andy Bliss responded. After the vehicle was removed and the police released the scene, train 99(20) continues its trip south to Newport News, VA.

Train 76(20) - Thomasville, NC - Trespasser Incident

20SEP26: 6:39pm Train 76(20) with E/NC1755 and E/NC103, plus 4 cars, carrying 190 passengers, struck a trespasser at MP 306.2 on the Norfolk Southern Danville District Subdivision. The incident took place in the City of Thomasville, Davidson County, NC. This strike did not occur at a DOT grade crossing. There were no reported injuries to crew or passengers. The trespasser was conscious when she was transported to the hospital. The weather at the time was 77° and partly cloudy.

After the train and scene were released by Thomasville Police, the crew advanced the train to Greensboro station where it held for relief engineer and conductor.

Train 448(19) Terminated at Albany-Rensselaer, NY - Air Problems/Car Failure

20SEP26: Train 448(19) with E/85, E/106 and 4 cars with 111 customers was terminated at Albany due to C/43397 and C/62513 having air problems. Albany was able to secure buses to take the customers between Albany and Boston. This also caused train 449(21) to originate at Albany with alternate buses between Boston and Albany.

There were two buses secured thru Wade tours that will provide transportation for both trains and were estimated to arrive Albany at 5P-ET. The bus did bypass Framingham and Back Bay Boston. (4) Customers were to get off at Pittsfield and taxis were secured to take them to their final destinations.

Train 65(19) - Wilmington, DE - Engine Failure

20SEP26: Train 65(19) was delayed at Wilmington Station/MP 26.9 on the Amtrak PW Line due to the MCB opening whenever the engineer attempted to take power. HEP was maintained each time and throughout the delay. The crew consulted with Mechanical and the issue was resolved. Train 65(19) was able to depart Wilmington Station using only 50% of its tractive power.

<u>Train</u>	<u>Delay</u>	<u>Comment</u>
65(19)	35"	

Train 66(19) - North of Wilmington, DE - Engine Failure

20SEP26: Train 66(19) plus 5 UNCLASSIFIED 85 passengers was initially delayed on the Amtrak PW Line at MP 19.0 due to the MCB on E/633 opening and causing the HEP to drop. The crew recycled and managed to close the MCB, restore HEP, and get back on the move north. Shortly after, at MP 12.6, the MCB opened again, dropping HEP as well. The crew again recycled, resolved the issue, and got back on the move north into 30th Street Station/Philadelphia.

The train held for mechanical personnel in the station. Once on scene, mechanical inspected the equipment and gave the all clear for the train to proceed east to NYP. Due to these delays, and the already in progress Metro North outage due to the Walk Bridge Project, the window to traverse the Metro North Territory NYP-NHV was missed. At the time of this writing, the operational plan was relayed as follows:
The 85 remaining passengers were connected on Metro North trains 3502 and 3504, which departed Grand Central Station at 4:54am and 6:00am, respectively, for travel from New York to New Haven. Once at New Haven the passengers were moved to Amtrak Trains 150(20) or 160(20).

Train 591(20) East of Los Angeles, CA - Main Res Hose Partings

21SEP26: Train 591(20), carrying 136 customers onboard and operating with cab car 6900, five cars, and locomotive C2116, was delayed east of Los Angeles, CA, at MP 148.8 on the BNSF San Bernardino Subdivision due to a loss-of-load condition. The crew identified low main reservoir (MR) faults and discovered two parted MR hoses, believed to have resulted from striking debris. Head-end power remained operational except when temporarily shut down to facilitate troubleshooting and repairs. The crew reconnected the MR hoses between cars C6452 and C6451 and between cars C6852 and 34082. Following completion of the repairs, the train resumed its trip.

Train 28(20) West of Pasco, WA - Freight Train Interference

21SEP26: Train 28(20), carrying 96 customers onboard, was delayed west of Pasco, WA, while holding at Cushman (MP 227.7) on the BNSF Fallbridge Subdivision due to freight traffic interference. BNSF freight train H-TACPAS1-20A, led by BNSF 7447, was stopped ahead with a shifted load requiring inspection by a carman. Following the inspection, the freight train was authorized to proceed, allowing Train 28(20) to resume movement. The train encountered additional stop-and-go operations before transitioning to the Lakeside Subdivision and continuing toward Pasco.

Train 6(20) East of Winnemucca, NV - Freight Train Interference

20SEP26: Train 6(20), carrying 105 customers onboard, was delayed east of Winnemucca, NV, on the Union Pacific Elko Subdivision due to freight traffic interference. The train was required to follow freight train MRVSP-19, led by UP 7101, after the freight lost a locomotive motor near Valmy, restricting its operating speed to 40 MPH. Additional delays were incurred after MRVSP-19 activated a hot bearing detector, requiring the freight to further reduce speed to 30 MPH while proceeding to the next detector. Train 6(20) subsequently crossed over at Whirlwind (MP 612) and operated on the adjacent main track to Alazon MP 603.7), allowing it to proceed around the affected freight traffic.

Train 3(19) West of Winslow, AZ - Freight Train Interference

20SEP26: Train 3(19), 26-FOI-00757 00000008824 UNCLASSIFIED, 9/29/2026 delayed west of Winslow, AZ, on the BNSF Seligman Subdivision due to freight traffic congestion. The train met BNSF 7356 at West Winslow (MP 287.4) before encountering additional delays near MP 292.9. The train continued following freight traffic to East Canyon Diablo (MP 310.1), where additional congestion resulted from two BNSF Z-trains requiring Level 1 setouts. Multiple freight trains were backed up through the territory, including BNSF 7495E, BNSF 4960E, BNSF 5297E, and BNSF 3899W, contributing to continued delays between approximately MP 290.8 and MP 329.5.

PTC Outage Across Multiple Host Railroads - Delays

19SEP26: At approximately 11:50 PM PT multiple trains began experiencing issues initializing the I-ETMS Positive Train Control (PTC) system, with crews reporting the system timing out during configuration. The system issue affected train movements at multiple locations, requiring authorization to operate with PTC cut out.

The following trains were impacted:

-Trains 751(19) and 719(19) were positioned at Oakland Jack London Square, CA, following

customers onboard, was delayed departing Salt Lake City, UT, and was subsequently authorized to operate with PTC cut out at a maximum speed of 59 MPH.

-Train 14(19), operating with locomotives E/345 and E/349 and nine cars, was delayed departing Sacramento, 26-FOI-007571 000000088245 UNCLASSIFIED 8/29/2026 authorized to operate with PTC cut out at a maximum speed of 59 MPH.

-Train 1(19)/421(18), operating with locomotives E/327 and E/23 and nine cars, departed San Antonio, TX authorized to operate with PTC cut out at a maximum speed of 59 MPH.

-Train 794(19), operating with locomotive E/C2116 and six cars, was delayed operating across the NCTD San Deigo subdivision due to PTC systems. Train was authorized to run cut out with maximum speed of 59 MPH.

20SEP26: PTC issues were ongoing and trains reported unable to initialize at various locations for multiple host railroads; UPRR, CN and CFRC.

-Train 300(20), E/IDTX4614 and 5 cars, with 40 customers, was unable to initialize PTC for UPRR at St. Louis, MO, and was not authorized by UPRR to depart the initial terminal with PTC inoperative.

- Train 302(20), E/IDTX4602 and 5 cars, with 72 customers, was unable to initialize PTC for UPRR at St. Louis, MO, and was not authorized by UPRR to depart the initial terminal with PTC inoperative.

- Train 365(20), E/IDTX4630-7 cars-E/IDTX4615, with 21 customers, was unable to initialize PTC for CN at Port Huron, MI and was authorized by CN to proceed without PTC. Train 365(20) was delayed enroute operating 59MPH MAX.

- Train 22(20)/422(18). E/311-E/63 & 8 cars, with 143 customers, was unable to initialize PTC for UPRR at San Antonio, TX, and was not authorized by UPRR do depart the initial terminal with PTC inoperative.

- Train 2(18), E/363-E/332 & 7 cars, with 81 customers, was unable to initialize PTC for UPRR at San Antonio, TX, and was not authorized by UPRR do proceed with PTC inoperative.

- Train 53(19), E/352-E/360 with 14 cars, 25 auto carriers and 391 customers, was delayed at Deland, FL, due to unable to initialize PTC for CFRC and was not authorized by CFRC to proceed with PTC inoperative.

- Train 41(18), E/383-E/45 & 11 cars, with 162 customers, was delayed at Jacksonville, FL, due to unable to initialize PTC for CFRC.

DIT engaged on a Severity 1 bridge line, to troubleshoot issues with UPRR and CN PTC participating on the conference call. WABTEC identified a change that was implemented early AM 20SEP which was not expected to be impactful. WABTEC rolled back the change at 756AM-ET and all impacted trains were able to successfully initialize PTC.

Train 4(19) Albuquerque, NM - Engine Failure

20SEP26: Train 4(19), 25-FBI-00757 200000008824, E/194, UNCLASSIFIED, 9/29/2026, delayed departing Albuquerque, NM, on the Rio Metro Albuquerque Subdivision after it was discovered en route that lead locomotive E/22 was operating with expired blue card time. E/22's blue card had expired on September 15, 2026, and the locomotive should not have been released for service. The crew was advised that the locomotives would need to be flat switched at Albuquerque, while attempts were made to source a freight locomotive. After no replacement locomotive was secured, the flat switch was completed, E/22 was isolated to provide HEP only, and Train 4(19) departed Albuquerque with E/194 as the sole locomotive providing tractive effort.
