Train 157(26) - South of Baltimore, MD - Engine Failure

26JUL26: Train 157(26) was delayed on the Amtrak PW Line at MP 104.0 due to the engineer being unable to clear an unknown penalty, after recycling the engine. The engineer declared an ACSES failure and cut out ACSES to alleviate the "no power brake" fault. Subsequently the train was restricted to 79MPH. At Carroll Interlocking/MP 127.0, the engineer reported the issue reoccurred. The engineer declared an en route cab signal failure and cut out cab signals. The train was subsequently restricted to 59MPH, into Washington Union Terminal, per Rule 556.

Train 8/28(25) West and East of Glasgow, MT - Freight Train Interference

26JUL26: Train 8/28(25) was delayed west of Glasgow, MT, while holding at Tampico Siding (MP 289.4) on the BNSF Milk River Subdivision due to multiple train meets and freight congestion. The train met Amtrak Train 7/27(25), BNSF 7322, and BNSF 7371, and was subsequently required to follow BNSF 7635 through the territory. The train was also operating under 40 MPH heat-related speed restrictions, which contributed to additional delay.

After departing Tampico and arriving at Glasgow, MT, the train encountered further congestion east of Glasgow while holding at Kintyre Siding (MP 252.9) on the BNSF Glasgow Subdivision. There, it met BNSF 7358 and BNSF 7835 before continuing eastward.

Train 6(26) Winnemucca, NV - Heat Orders

26JUL26: Train 6(26), carrying 106 customers onboard, was delayed while operating across the Union Pacific Nevada and Elko Subdivisions due to heat-related speed restrictions. The train was required to operate at reduced speeds on the Nevada Subdivision between approximately MP 318.6 and MP 421.0, extending east toward Winnemucca, NV.

After clearing the initial restriction territory, the train encountered additional heat orders on the Union Pacific Elko Subdivision, requiring continued reduced-speed operation between MP 421.26 and MP 619.5. Once clear of the affected territory, Train 6(26) resumed normal operating speeds.

West of Kirkwood, MO - UP Freight Train Derailment

26JUL26: Due to a UPRR freight derailment west of Kirkwood, MO/MP13.49, with 28 coal cars derailed and 900 feet of track damaged, train 316(26) is terminated at Washington, MO. with alternate buses secured. The equipment operated deadhead with BNSF pilots across a detour between Pacific/MP34.7 and St Louis, MO/MP1.5. Missouri River Runner Service is adjusted at follows:

-Train 311(27) was cancelled with alternate buses sourced. Bus One operated between St Louis, Kirkwood, Lee's Summit, and Kansas City. Bus Two operated between St Louis and Kansas City making all stops.

-Train 318(27) originated at St Louis with alternate buses sourced. Bus One operated express between Kansas City and St Louis. Bus Two operated between Kansas City, Lee's Summit, Kirkwood, and St Louis. Bus Three operated between Kansas City and St Louis making all stops.

-Train 316(27) was cancelled in its entirety with an alternate bus secured. Bus One operated between Kansas City and St Louis making all stops.

-Train 319(27) terminated at St Louis, with alternate buses secured. Bus One operated express between St Louis and Kansas City. Bus Two operated between St Louis, Kirkwood, Lee's Summit, and Kansas City. Bus Three operated between St Louis and Kansas City making all stops.

Train 316(26) was further delayed en route to Washington, MO by UP freight UP/5285 at Dow siding. The freight crew was having trouble repairing a broken knuckle.

27JUL26: There is no estimated time for open track at this time. UP will hold a conference call at 6:30AM CT and will have more information afterwards.

Pacific Surfliners San Clemente Pier, CA - Ocean Water Affecting Track Indication

25JUL26: Multiple Pacific Surfliner trains experienced delays due to high tide ocean conditions affecting the Metrolink Orange Subdivision east of San Clemente Pier, between approximately MP 206 and MP 207. The high tides caused track indication failures, requiring trains to flag through the affected area at restricted speed. These restrictions resulted in cascading delays throughout the corridor, including additional train meets, congestion, and late-turn equipment impacts.

At approximately 11:50 PM PT, Metrolink reported a track-blocking event caused by a ballast washout in the same area. Maintenance crews were mobilized to make repairs, and rail service through the location was suspended pending restoration of the track structure.

Due to the overnight outage and the inability to secure bus transportation, the following Pacific Surfliner service adjustments were implemented:

- Train 595(25), carrying 461 customers onboard, was terminated at Oceanside (OSD) and returned toward its origin as a drop-off-only movement.
- Train 794(25), carrying 132 customers onboard, was terminated at Irvine (IRV) and returned toward its origin as a drop-off-only movement.
- Train 562(26) was canceled in its entirety, with customers directed to the next available service.
- Train 761(26) was canceled between San Diego and Los Angeles and instead originated in Los Angeles for service to Goleta (GTA).

Maintenance forces continued repair efforts while rail operators implemented service recovery measures across the corridor.

26JUL26: Tracks returned to service at approximately 6:00 AM PT, however, a track indication remained due to the tides causing more service delays. Metrolink advised personnel would be on site, 24/7 for the next several days to assist.

Train 301(25) South of Springfield, IL - Engine Failure

25JUL26: At 10:45AM-CT, Train 301(25), Engine ID4627-5, stopped 13.8 miles south of Springfield, IL (MP185.1), on the UPRR Springfield Subdivision at MP198.8 due to a low oil fault on locomotive ID4627. The engine was shut down with no head end power while the crew worked with CNOC Mechanical and Siemens to troubleshoot the issue. The 171 customers onboard remained on the train with outdoor temperatures of 75 degrees and cloudy conditions. Troubleshooting determined the locomotive had no hydrostatic oil and could not be restarted. Train 301(25) was subsequently terminated at location.

The Bloomington-Normal Road Foreman responded to the train at 12:00PM-CT with oil in an attempt to restart the locomotive and restore head end power; however, those efforts were unsuccessful. Train 319(25) was utilized as the rescue train and coupled onto the head end of Train 301(25) at 1:45PM-CT with HEP restored at 2:08PM-CT. Once secured, the double-draft movement departed the location and was back on the move to St. Louis at 2:18PM CT. Four buses were secured and staged trainside between 2:00PM-CT and 3:00PM-CT and ultimately shadowed the train to St. Louis.

As a result of the disruption and lack of equipment, Trains 306(25) and 301(26) were cancelled entirely. Train 306(25) had three on time buses secured to operate between St. Louis and Chicago. Train 301(26) had five on-time buses secured:
-Buses one, two, and three operated express from Chicago to St Louis.
-Bus four operated from Chicago making stops at Bloomington-Normal and Springfield.
-Bus five operated between Chicago and St Louis making all stops.
