Train 307(21) departed Chicago at 712pm; 2 minutes late and then stopped on the mainline outside the train shed overbuild to test the X-ITCS cab signals. The first two attempts were unsuccessful, and the train was moved to a different location before attempting a 3rd test of the X-ITCS cab signal system. After downloading 314 computer files, engine 56 completed a successful X-ITCS test at 907pm. Train 307(21) was back on the move at 911pm for a 1 hour and 57-minute en route delay testing the X-ITCS cab signals on engine 56.
