Operating Highlights

Train 40(29) North of Jacksonville, FL - Defect Detector Actuation

29JUL26: Train 40(29) operating with engines 346, 58, 10 cars, and 144 customers onboard was delayed 22 miles north of Jacksonville, FL on the CSX Nahunta subdivision inspecting their equipment after actuating the Singley hot box detector at milepost 617.5. The crew did not have a tempil stick to properly test the third axle on lead unit 346 and had to wait for Amtrak management from Jacksonville, FL to arrive with one to test. Upon proper inspection the axle was cleared for track speed and the train was on the move at 2:00 a.m.

40(29)	2'26"	

Train 97(29) Richmond Staples Mill, VA - Freight Train Interference

29JUL26: Train 97(29) operating with engines 381, 46, 10 cars, and 272 customers onboard was delayed departing Richmond Staples Mill, VA on the CSX RFP subdivision due to CSX freight M407-29 setting off a car at Acca Yard. Once the freight dropped the car and proceeded, 97(29) was able to depart but followed the freight south to Petersburg, VA.

Train	Delay	Comment
97(29)	1'02"	

Train 2193(29) New Haven, CT - Engine Failure

29JUL26: Acela 2193(29) operating with engine 2015, 6 cars, engine 2101, and 275 customers onboard was delayed arriving into New York, NY after the crew was ordered in due to onboard PTC failure caused by ATS and ATC faults onboard. The train was capped at 59 mph on Metro North territory and Amtrak territory. No recrew was available causing the train to be ordered in by TOC in New York, NY.

Train 56(29) North of Brattleboro, VT - Weather

29JUL26: Train 56(29) operating with locomotives 339-356, 10 cars and 204 customers onboard was delayed from Brattleboro, VT to Bellow Falls, VT on the CSX Palmer subdivision operating at 10 mph through flash flood warnings from milepost 110 to milepost 136.

Train	Delay	Comment
56(29)	1'12"	

Train 41(28) Washington D.C. - Engine Failure

29JUL26: Train 41(28) operating with locomotives 339-356, 10 cars and 204 customers was delayed at Washington when locomotive 339 went into an unrecoverable penalty that mechanical was unable to reset. A locomotive power change was required to replace the 339 with locomotive 88 which required the completion of servicing to be made ready to be added. Additional engine issues occurred causing both replacement engines to be replaced again with units 305 and 316. The replacements arrived on site with the train at 6:28 p.m. and train 41(28) departed Washington D.C. at 6:51 p.m.

Due to the ongoing engine issue involving 41(28), multiple southbound trains were late departing from Washington D.C. including 19(29) and 97(19).

Service recovery was initiated and consisted of snack packs and water for all coach customers and unscheduled dinner service for all first class customers.

Train 2109(29) West of Metropark, NJ - Pantograph Damage

29JUL26: Next Gen Acela 2109(29) operating with TS-12 became disabled on the New York to Philadelphia Line West of Metropark with a damaged pantograph alarm. The crew inspected and confirmed damage to the pantograph and were able to raise the front pantograph to restore HEP. Customers were transferred to train 141(29) and 2109(09) was terminated at its location. After the passenger transfer was complete ET responded and secured the broken pantograph in the cradle to allow the equipment to deadhead to Washington for repair.

As a result of the shopped equipment train 2158(29) was cancelled in its entirety.

Amtrak Hudson Line - Flooding- Weather

29JUL26: Due to heavy rain falling on the Hudson River and maintained Hudson Line flash flooding conditions impacted service with roadbed scouring, flooding and washouts becoming present between Albany, NY and Poughkeepsie, NY. Trains operating over the line at the time the flooding began were returned to their point of origin and service was initially suspended until 3pm-et. IMCS personnel responded and began to perform track inspections identifying locations between MP102-106 and MP129-134 as areas significantly impacted by flooding and track bed erosion and CP124 as a location of switch and signal damages. Staffing, material, equipment and resources were mobilized to the affected areas to begin making repairs. Once these areas were identified, suspension of service was extended for the remainder of the day to allow crews to perform work safely and expeditiously.

Train 63(29) was held at Rhinecliff and returned to New York discharging customers at their point of origin enroute.

Train 64(29) was delayed at NFS discharging their customers after the termination at Niagara Falls.

Train 290(29) departed Burlington on-time and was reversed back to Burlington to discharge customers traveling to New York after the suspension of service was made. Train 290(29) was then delayed by VRS freight train interference preventing the departure from Burlington a second time. Once the route was clear train 290(29) was able to depart. Train 291(29) was delayed at ALB off the turn from 290(29).

The following service adjustments were made:

280(29), 284(29), 290(29) Terminated Albany

281(29), 283(29), 291(29) Originate Albany

63(29) cancelled Rhinecliff - Niagara Falls

64(29) Terminated Niagara Falls

68(29), 69(29), 233(29), 234(29), 235(29), 236(29), 237(29), 238(29), 239(29), 240(29), 241(29), 243(29), 244(29), 245(29) Cancelled

49/449(29) Cancelled New York to Albany and Boston to Albany, Originate Albany with no alternate transportation

48/448(29) Terminated Albany with alternate busing Albany to Boston and Albany to New York

230(30) and 232(30) Cancelled

Train 318(29) Kansas City, MO - Freight Train Interference

29JUL26: Train 318(29) was delayed at MP273.3 on the UPRR Sedalia Subdivision (MP6.9) on the KCT Kansas City Terminal Subdivision due to a freight trespasser strike ahead. At 6:45AM-CT, IG4LB-28 (UP 7628) fatally struck a trespasser at MP274.9, 1.6 miles west of the Independence, MO station (MP273.3) on the UPRR Sedalia Subdivision. RMCC closed both main tracks while the investigation was conducted. Once the investigation was completed and the tracks were released for service, Train 318(29) was authorized to depart Kansas City and continue its route.

Train 381(29) West of Chicago, IL - Engine Failure

29JUL26: Train 381(29), with E/194 and four cars, was stopped at 7:45AM-CT approximately 1.3 miles west of Chicago, IL, on the Amtrak Chicago Line due to a loss of head end power. The train was carrying 46 customers, and weather conditions were 70 degrees and sunny. Head end power was restored at 7:58AM-CT, and Chicago Mechanical personnel boarded the train to troubleshoot the issue. Mechanical forces replaced the EGU, which resolved the problem. A contingency plan had been established to shove the train back to Chicago Union Station and cap it with engine 504 if repairs were unsuccessful. Following completion of repairs and testing, Train 381(29) resumed westward movement at 8:47AM-CT.

Train 524(29) San Jose, CA - Third Party Contractor Car Failure

29JUL26: At approximately 3:00A-PT, mechanical personnel in San Jose, California found a condemnable wheel on C/C8202. With no additional equipment in San Jose, and no means to rectify issues at location, Train 524(29), which normally operates San Jose to Sacramento, CA, was cancelled in its entirety. Customer service was unable to source buses from San Jose, therefore customers were reaccommodated on the next available service. The equipment turn in Sacramento for Train 537(29) was also cancelled in its entirety with customers reaccommodated on the next available service. The equipment operated at restricted speed from San Jose to Oakland maintenance facility for repairs.
