Palm Springs, CA Closure - High Winds

13JAN25: Palm Springs Station, located at MP 588.2 on the Union Pacific Railway Yuma Subdivision, is subject to temporary intermittent closures caused from high winds creating a build up of sand in the switches to enter Garnet Siding. This sand build up prevents the switches from being lined, and causes the internal gear mechanism of the switch to cease up. This prevents train crews from hand lining the switch and being able to access the station platform. Standing policy states that when this occurs trains will bypass the station at Palm Springs and passengers will be transported to the next stop of Ontario, CA or Yuma, AZ, no alternate transportation will be provided.
