Portal North Bridge - Delays/ M of W Work

18FEB26: Train delays were largely attributable to Amtrak's cutover work transferring service from the 115-year-old Portal Bridge to the new Portal North Bridge. The multi-week construction effort resulted in reduced Amtrak and NJ TRANSIT service levels through the area, which created operational constraints and contributed to slower movement and periodic congestion. Although trains continued to operate throughout the day, the limited track availability and ongoing infrastructure adjustments frequently impacted scheduled operations

Train 1340(20) East of Tomah, WI - Snowbank Strike

20FEB26: At 3:06 p.m. CT, Train 1340(20), operating with engines 519 and 169 and three cars, struck a large snowbank east of Tomah, WI, at Milepost 233 on the CP Tomah Subdivision. Both locomotives initially shut down, leaving the train without Head End Power (HEP) in 28-degree cloudy weather with 208 passengers onboard while CNOC Mechanical began troubleshooting. The crew succeeded in restarting trail engine 169 restored at 3:40 p.m. Efforts to isolate lead engine 519 to operate as a cab car were unsuccessful, prompting a plan for Train 8/28(18) to couple to 1340(20) and operate as a double draft into Chicago, with all passengers boarding on 1340(20) due to capacity constraints.

A dispatching error required 8/28(18) to first couple to the rear of 1340(20) and shove the consist to the nearest siding before running around and coupling to the east end. Once connected, the combined 8/28(18)-1340(20) train proceeded east to Chicago, making all station stops for both trains, though double spotting caused additional delays.

Due to the late operation of train 1340(20), two buses were sourced for Train 341(20), with one bus making all stops between Chicago and Milwaukee and the other operating express.
