Operating Highlights

Train 1(02)/421(01) East of Yuma, AZ - Freight Train Interference

04MAY26: Train 1(02)/421(01), operating with locomotives E/23 and E/19, and nine cars was delayed approximately 79 miles east of Yuma, AZ, while traversing the Union Pacific Gila Subdivision. The delay occurred as the train was required to follow UP 5805 between MP 812 and MP 785, resulting in reduced speeds and holding through the territory. Once the freight movement cleared and dispatching conditions improved, Train 1(02)/421(01) resumed its westbound trip.

<u>Train</u>	<u>Delay</u>	<u>Comment</u>
1(02)/421(01)	33"	

Train 586(03) West of San Diego, CA - Trespasser Incident

04MAY26: At approximately 8:50 PM PT, Train 586(03), operating with locomotive E/C2121, six cars, and 120 customers onboard, fatally struck a trespasser at Tecolote (MP 263.1) on the NCTD San Diego Subdivision, within San Diego, San Diego County, CA. The trespasser was subsequently struck by passing Coaster Train 689. The incident occurred on double-main-track territory and not at a public highway grade crossing. Head end power was maintained. Weather was 59 degrees and cloudy.

Following the strike, Train 586(03) proceeded into San Diego Old Town Station with 120 customers onboard, 61 of whom were destined for San Diego. Those 61 customers detrained at Old Town and utilized the San Diego Trolley to complete their trips. Local Sheriff's Office personnel and an Amtrak Trainmaster responded to the scene. The train experienced extended delays while awaiting the County Medical Examiner and law-enforcement authorities to complete their investigation and release the territory. Once the investigation concluded and the scene was cleared, rail movement resumed.

As a result of the incident, several additional trains experienced delays in the corridor:

Train 595(03) experienced a significant delayed departure from San Diego Station. There were 29 customers when it departed.

Train 588(03) was held east of Sorrento Valley Station (MP 262), with most customers detraining at Sorrento Valley and three customers remaining onboard.

Train 790(03) was held at Sorrento Valley Station, Platform 2, where most customers detrained, with fewer than 10 customers remaining onboard when service resumed.

Once the territory was reopened and dispatching normalized, all affected trains were released to continue service. Service-recovery measures were implemented onboard impacted trains to support customers during the extended disruption.

National Response Center Number: 1461476

Train 8(02) Wenatchee, WA - Engine Failure

03MAY26: At 9:10 PM PT, Train 8(02), operating with locomotive E/302, six cars, and 110 customers onboard, was delayed 4 miles west of Wenatchee, WA Station, at MP 1653.82 on the BNSF Scenic Subdivision, after the locomotive shut down due to a low hydrostatic oil fault, resulting in a loss of head-end power (HEP). Weather conditions at the time were reported as 68°F and clear.

A passing BNSF coal train assisted by shoving Train 8(02) into Wenatchee Station, where it arrived at 10:20 PM PT. While the crew inspected the locomotive, BNSF freight locomotive 6851, operating on a vehicle train located at Albus Siding approximately 25 miles east, was identified and arranged to be leased as a rescue unit. Simultaneously, the inbound engineer procured six containers of 30-weight oil, which were added to the locomotive. Following the oil refill, the locomotive was successfully restarted, and head-end power was restored at approximately 11:05 PM PT, with 115 customers onboard at that time.

Once the rescue locomotive was added to the consist and all required testing was completed, Train 8(02) was released and departed Wenatchee at 11:55 PM PT, continuing its trip.

Train 6(02) East of Colfax, CA - Engine Failure

02MAY26: At 12:03PM-PT, Train 6(02) E/174R/148 cars, 5/26/2026 stopped approximately 10.5 miles east of Colfax, CA (MP 141.9) on the UPRR Roseville Subdivision, at MP 152.4, due to engine mechanical issues. The crew reported that trail engine 14 was experiencing dynamic brake and loading problems and contacted CNOC Mechanical for troubleshooting assistance. During this time, head-end power was intermittent, with 140 customers onboard. Weather conditions at the time were 73 degrees and partly cloudy. The issue was initially believed to be resolved, and the train resumed movement; however, the mechanical problem reoccurred, resulting in additional stops at MP 157.6, MP 161.4, and MP 166.5. LAX Mechanical continued working with the crew to troubleshoot and stabilize the equipment. At 1:46PM-PT, Train 6(02) was able to continue east. The train was met at Reno, NV where the Road Foreman assisted the crew in a full locomotive reset; however, the unit once again stopped loading by Sparks, NV. A freight motor - UP7364 - was sourced and added the the head end at Salt Lake City, UT upon arrival.
