Train 6(26) West of Salt Lake City, UT - Freight Train Interference

27AUG26: Train 6(26), carrying 134 customers, experienced a delay west of Salt Lake City, UT, on the UPRR Shafter Subdivision while awaiting a meet with freight train UP 7372 at Cliffside Siding.

The delay occurred due to normal railroad traffic management and dispatching requirements associated with single-track operations, which required Train 6(26) to hold while UP 7372 completed its movement through the territory. Once the freight train cleared the siding and track authority was granted, Train 6(26) resumed its route.

Train 28(26) Bingen-White Salmon, WA - Right of Way Fire

27AUG26: Train 28(26), carrying 71 customers, experienced a delay at Bingen, WA, on the BNSF Fallbridge Subdivision due to reports of a fire within the railroad right-of-way near MP 102.5.

Upon notification of the fire, local authorities responded to the scene and halted all rail traffic in the affected area as a precaution to ensure the safety of train operations, emergency responders, and railroad infrastructure. Train 28(26) remained held at Bingen while the incident was evaluated and emergency personnel addressed the situation.

A track inspector was dispatched to inspect the affected territory and determine whether any damage had occurred to the track structure or surrounding railroad property. After completing the inspection, the track inspector provided an all-clear, confirming that train operations could safely resume.

Train 4(25) East of Trinidad, CO - High Wind Warnings

27AUG26: Train 4(25), carrying 122 customers, experienced a delay west of Trinidad, CO, on the BNSF Raton Subdivision due to adverse weather conditions. The delay was caused by high winds reaching approximately 60 mph, which required a reduction in train speed to ensure safe operations.

In accordance with operating and safety requirements, the train's speed was restricted to 40 mph between Mileposts 571 and 615. The temporary speed restriction remained in effect until the train cleared the affected territory.

Once operating conditions permitted, Train 4(25) resumed normal operations and continued its route.

Train 4(26) Los Angeles, CA - Engine Failure

27AUG26: Train 4(26), carrying 87 customers, experienced a delayed departure from Los Angeles, CA, on the SCRRA/Metrolink River Subdivision due to a locomotive issue. During pre-departure operations, lead locomotive AMTK 170 was bad ordered after experiencing wheel slip issues, rendering it unsuitable for service.

Mechanical and operating personnel evaluated the situation and determined that the locomotive needed to be removed from the consist. To restore the train to service, locomotive AMTK 170 was taken out of service and replaced with locomotive AMTK 138.

Following the locomotive change and completion of the necessary mechanical inspections and operational requirements, Train 4(26) departed Los Angeles and continued its scheduled route. The delay was attributed to the time required to remove the defective locomotive and position the replacement unit.

Train 785(26) West of Van Nuys, CA - Disabled Freight Train

26AUG26: Train 785(26), carrying 122 customers, experienced a delay east of Chatsworth, CA, on the SCRRA/Metrolink Ventura Subdivision due to a disabled freight train. UP 7012 became disabled at MP 446.73 on the Ventura Subdivision, approximately one mile east of Chatsworth, obstructing normal rail traffic and preventing Train 785(26) from proceeding.

The freight train was awaiting the arrival of a carman to replace a defective air hose and complete necessary repairs. As the delay continued and to minimize customer impact, operating personnel coordinated an alternative plan for Train 785(26).

As a result, Train 785(26) shoved back to Ventura (VNC), where it held pending completion of repairs to the disabled freight train. Once the freight equipment was repaired and the track was cleared for movement, Train 785(26) resumed its route.

Train 794(26) South of Ventura, CA - Vehicle Strike

26AUG26: Train 794(26) was delayed by a vehicle strike and carrying 84 passengers, struck an unoccupied vehicle near MP 398, approximately five miles south of Ventura, CA, on the UPRR Santa Barbara Subdivision. Following the collision, the train crew conducted the required inspections and confirmed that Head End Power (HEP) remained active. No injuries were reported to passengers or crew members.

After coordination with operating personnel, the incident train crew agreed to advance the train to Los Angeles (LAX). Upon arrival, the 794(26) equipment was designated to proceed to 8th Street for inspection and any necessary follow-up actions related to the incident. Train 587(26) was utilized for an on-time section of 794(26) operating south of Los Angeles, CA.

Train 794(26) was released and resumed movement. Shortly thereafter, the dispatcher received a report of another vehicle on the tracks near MP 402, approximately four miles from the original incident location. As a precautionary measure, Train 794(26) was instructed to hold at MP 400 pending confirmation that the route was clear and safe for movement.

A track inspector was dispatched to investigate the report, and a tow truck was assigned with an estimated arrival time of 30 minutes to remove the vehicle from the right-of-way. The delay was attributed to both the initial vehicle strike and the subsequent track obstruction report, which required additional protective measures before train operations could safely resume.

Train 3(25) East of Gallup, NM - Trespasser Incident

26AUG26: Train 3(25), consisting of locomotives E/22-181-78, nine cars, and carrying 121 passengers, reportedly struck a trespasser at MP 99.8, 58 miles east of Gallup, NM on the Gallup Subdivision .

Following the incident, the conductor performed a walking inspection of the train and surrounding area, and emergency responders were dispatched to the scene. The trespasser was located alive and reported no injuries. Subsequent assessment determined that the train had struck the individual's bag rather than the person.

After EMS arrived on scene and the required inspections were completed, the train was authorized to resume service and continued on its route. No injuries were reported to passengers or crew, and the delay was limited to the time necessary to conduct the inspection and coordinate with emergency responders.

Train 540(26) Oakland, CA - Third Party Contractor Engine Failure

26AUG26: Train 540(26) carrying 17 customers experienced a delayed departure from Oakland, CA, on the UPRR Niles Subdivision after locomotive C2124 required additional coolant. To address the issue, the train returned to OMF, where mechanical forces added coolant and inspected the locomotive before it could be released for service. Due to the resulting delay and to minimize further impacts to customers, Train 540(26) originated from Emeryville, CA, instead of Oakland. Customers scheduled to board at Oakland were accommodated on Train 542(26) to continue their travel with minimal disruption.

Train 534(269) Richmond, CA - Third Party Contractor Engine Failure

26AUG26: Train 534(26), carrying 44 customers, became disabled at Richmond, CA (MP 11.9) on the UPRR Martinez Subdivision after a JPBX921 shutdown caused a loss of Head End Power (HEP). The loss of HEP impacted onboard systems and prevented the train from continuing in service.

The operating crew worked with TASI to troubleshoot the mechanical issue; however, efforts to restore the equipment were unsuccessful. To minimize further delays and ensure customers could continue their trip, all 44 passengers were transferred to Train 536(26) for transportation to their final destinations.

As a result of the mechanical failure and inability to restore HEP, Train 534(26) was terminated at Richmond (RIC). Following passenger transfer and coordination with operating personnel, the equipment was deadheaded (DH) to OMF for inspection, diagnostics, and any necessary repairs.
