Train 566(27) East of Los Angeles, CA - Lost Head-End Power

27OCT25: Train 566(27) was delayed at the Buena Park Metrolink station, MP 161.3/BNSF San Bernardino Subdivision, 21.3 miles east of Los Angeles, following loss of head-end power as well as traction on locomotive E/C2122. Crew had reported the HEP was intermittently shutting-down and restoring on its own; then as the train approached Buena Park, the unit lost traction effort as well. Crew, with assistance from Los Angeles mechanical forces via phone, was able to restore HEP and traction after finding a loose 480V cable between the locomotive and first car (C/34082) as well as a complete reboot of the locomotive. There were 98 passengers onboard at the time and outside temperature was 60F and cloudy.

Locomotive CDTX/2122 failed a second time while operating on train 779(27) north of Old Town San Diego, CA (OLT) at MP 256.6 on the North County Transit District (Coaster) San Diego Subdivision. Locomotive CDTX/2122 shut down and failed to provide tractive effort along with a loss of Head End Power (HEP). The crew worked with the division management and Los Angeles Mechanical department and was able to restore operation of the locomotive after approximately 35". With multiple failures related to HEP the following recovery plan was enacted:

- 779(27) cancelled between Oceanside, CA and Los Angeles, CA - passengers accommodated on train 581(27).
- 779(27) operate deadhead to 8th St Maintenance Facility in Los Angeles for repairs.
