### ***Train 717(09) Emeryville, CA - Third Party Contractor Engine Failure***

10JUL26: Train 717(09) E/C2005, 8 cars, with 6 passengers onboard, was delayed departing Emeryville, CA due to loading issues on E/C2005. Crew worked with TASI mechanical and an Amtrak Road Foreman to troubleshoot the issue. The crew reported a turbo fault and reset the breaker which did not resolve the fault. After recycling the engine, the problem resolved and the train departed the station. Shortly after departure, the issue resurfaced and the train stopped 0.2 milese from the station. TASI mechanical was dispatched to the scene in order to further troubleshoot. Head-end power remained active during this event, with the weather a reported 57 degrees.

Due to the lengthy delay, the plan was for 719(09) upon arrival on scene, to couple to 717(09) and pull back to Emeryville, where both trains would then terminate. Train 717(09) was able to resolve the issue and get load to the engine just prior to the arrival of 719(09) and was able to shove back to Emeryville, CA under its own power, where both trains detrained passengers and then terminated. Once the equipment from 717 and 719 were coupled as a double-set, they proceeded to Oakland Maintenance Facility. Passengers destined Oakland were accommodated on bus 6619.

## City of New Orleans Service Disruption

27JUN26: Trains 58(27) and 59(28) were cancelled in their entirety after Mechanical forces in New Orleans identified multiple wheel defects during inspection of Train 59(25)'s inbound equipment, requiring 18 wheel set replacements. The defects were traced to a suspected rail issue narrowed to down between Carbondale, IL and Yazoo City, MS. CN performed track inspections between Carbondale and New Orleans and no track defects were identified. Chicago inspected Train 390(27)'s inbound equipment to which no defects were found which helped to narrow down the location. CN track inspectors were deployed to conduct a full inspection with a consensus of the rail conditions expected later that evening. As a precaution, sales for Trains 59(27) and 58(28) were shut down.

Train 59(26) was stopped at Yazoo City, MS for inspection, where multiple wheel defects were identified on the Fireman side of cars 31025, 34028, 34014, and 33026. The same side as the defects found on Train 59(25)'s inbound equipment. The train was subsequently terminated at Jackson, MS after CN Mechanical responded and deemed the equipment not fit to proceed to New Orleans. Efforts were underway to secure alternate

time. Amtrak's New Orleans Trainmaster and New Orleans Mechanical responded to Jackson, as well as CN Mechanical. The train 59(26) equipment was declared unsafe to move and was tied down on main track one at Jackson Station.

The following service adjustments were put into effect:

- Train 58(27-28) was cancelled in its entirety with no alternate transportation.
- Train 59(27-28) was cancelled in its entirety with no alternate transportation.

28JUN26: Due to lack of available equipment, the City of New Orleans service adjustments were extended through 29JUN as follows:

- Train 58(29) cancelled entirely, no alternate transportation between New Orleans and Chicago.
- Train 59(29) cancelled entirely, no alternate transportation between Chicago and New Orleans.

There were 26 enroute connecting passengers at Chicago impacted by the ongoing City of New Orleans service adjustments. These passengers were reaccommodated on Train 21/421(28) Chicago to Longview, TX, and then on thruway bus 6021(29) to Houston. As a result of accommodating these passengers, Train 21/421(28) was over capacity in coach by 26 seats between Chicago and St. Louis, MO. One supplemental bus was secured and operated Chicago to St. Louis express to alleviate the over capacity condition.

29JUN26: Due to the ongoing equipment availability issue, the service adjustments were extended through 30JUN.

30JUN26: Due to the ongoing equipment availability issue, the service adjustments were extended through 01JUL.

01JUL26: Due to the ongoing equipment availability issue, the service adjustments were extended through 03JUL.

02JUL26: Due to the ongoing equipment availability issue, the service adjustments were extended through 04JUL.

03JUL26: Due to the ongoing equipment availability issue, the service adjustments were extended through 06JUL.

04JUL26: The current plan is to resume service with Trains 58(07) and 59(07). Due to equipment availability, an additional cancellation was implemented. Trains 58(08) and 59(09) were cancelled and no alternate transportation was provided.

06JUL26: City of New Orleans service adjustments were updated as follows:

- Train 59(07) operated normal, Chicago, IL to New Orleans, LA.
- Train 58(07) cancelled entirely, no alternate transportation between New Orleans and Chicago.
- Train 59(08) cancelled entirely, no alternate transportation between Chicago and New Orleans.

09JUL26: Due to wheel defects found on 3 cars from inbound Train 59(07) in New Orleans, additional service adjustments are now enacted through 12JUL:

- Train 59(09-12) cancelled entirely, no alternate transportation between Chicago and New Orleans.
- Train 58(09-10) operated normal, New Orleans, LA to Chicago, IL.
- Train 58(11-12) cancelled entirely, no alternate transportation between New Orleans and Chicago.

## Palm Springs, CA Closure - High Winds

13JAN25: Palm Springs Station is located on the Union Pacific Railway Yuma Subdivision, is subject to temporary intermittent closures caused from high winds creating a build up of sand in the switches to enter Garnet Siding. This sand build up prevents the switches from being lined, and causes the internal gear mechanism of the switch to cease up. This prevents train crews from hand lining the switch and being able to access the station platform. Standing policy states that when this occurs trains will bypass the station at Palm Springs and passengers will be transported to the next stop of Ontario, CA or Yuma, AZ, no alternate transportation will be provided.
