Train 4(20) Needles, CA - Freight Train Interference

21JUL26: Train 4(20), carrying 188 customers onboard, was delayed west of Needles, CA, at approximately MP 582.5 on the BNSF Needles Subdivision due to BNSF freight train S-LBENSA3-18L experiencing air system issues while occupying the station platform ahead. The freight train's mechanical problems prevented Train 4(20) from accessing the platform and servicing the station. While BNSF personnel and a Road Foreman worked to resolve the issue, Train 4(20) was advanced closer to the station but remained unable to board or detrain customers until the freight movement cleared. Once the air system issues were corrected and the freight train resumed movement, the platform was released, allowing Train 4(20) to service Needles Station and continue its eastbound trip.
