Pacific Surfliner Service - NTCD San Diego Subdivision Signal Issue

21JUL26: At approximately 5:45 PM PT, North County Transit District (NCTD) reported a DOT crossing system malfunction on the San Diego Subdivision, requiring all trains to operate at no more than 20 MPH over every grade crossing within the affected territory. The restriction remained in effect while inspections and corrective actions were undertaken to ensure the proper functioning of the crossing warning systems.

The reduced-speed operation resulted in widespread delays to Pacific Surfliner service throughout the corridor. As train schedules became increasingly compressed, additional delays were incurred from train congestion, meets, and late-turn equipment cycles, affecting multiple northbound and southbound trains beyond the limits of the original restriction.

Train 506(21) Portland, OR - Engine Failure

21JUL26: Train 506(21), operating with locomotive WS1403 and five cars, was delayed departing Portland, OR Station after the locomotive shut down at scheduled departure time. Drummac Mechanical personnel responded and attempted a hard reset; however, locomotive WS1403 could not be restarted. During troubleshooting, customers were detrained while crews worked to restore head-end power (HEP) and assess recovery options. After unsuccessful recovery efforts, Train 506(21) was canceled due to locomotive failure. Alternate transportation was arranged, with two buses secured to transport affected customers and continue their travel.

To recover the equipment, BNSF locomotive 6361 was identified as a loaner unit and coupled to the trainset. The replacement locomotive was used to move the equipment back to Seattle, WA, where it could be inspected, repaired, and returned to service.

Train 581(21) San Clemente Pier, CA - Commuter Train Problems

21JUL26: Train 581(21) 26-FOR00627 in 00000008481 UNCLASSIFIED 8/7/2026 delayed while holding at San Clemente Pier Station due to Metrolink Train 621 striking a trespasser west of San Juan Capistrano near MP 196.4 on the Metrolink Orange Subdivision. The incident was reported as non-fatal, and all rail traffic in the area was halted while local authorities responded and conducted an investigation. Once the investigation was completed and the track was released for service, Train 581(21) resumed its trip toward Los Angeles.

As a result of the delay, 30 customers onboard Train 581(21) missed their scheduled connection to Train 4(21) at Los Angeles Union Station. To accommodate those customers, a supplemental bus was secured to pick them up at Fullerton, CA Station and transport them to Barstow, CA, where they were able to reconnect with Train 4(21) and continue their journey.

Train 503(21) South of Salem, OR - Engine Failure

21JUL26: Train 503(21), carrying 77 customers onboard, became disabled at Salem, OR Station (MP 718.0) on the Union Pacific Brooklyn Subdivision after the crew reported a loss of head-end power (HEP) and tractive effort while attempting to depart. Mechanical personnel assisted with troubleshooting, and the train was initially able to resume movement; however, the locomotive subsequently shut down again.

Further troubleshooting determined that the locomotive would shut down whenever HEP was brought online. Additional restart attempts without HEP failed to restore normal operation, and the locomotive was ultimately declared a failure. A Union Pacific local train assisted by shoving the disabled train back to the Salem station platform, allowing customers access to the staffed station facility. Train 503(21) was subsequently terminated at Salem, and two buses were secured to transport customers to Eugene, OR.

The same buses were then used to represent Train 508(21), which was canceled in its entirety due to the equipment failure. To recover the disabled equipment, Train 14(20) coupled onto the consist and transported it to the Seattle Maintenance Facility for inspection and repair.

Train 4(20) Winslow, AZ - Engine Failure & Weather Delays

21JUL26: Train 4(20) ^{26-FOI-00821} ⁰⁰⁰⁰⁰⁰⁰⁸⁴⁸¹ ^{UNCLASSIFIED} ^{8/7/2026} departed Winslow, AZ with locomotives E/76 and E/30 and carrying 168 customers onboard, was delayed departing Winslow, AZ on the BNSF Seligman Subdivision due to propulsion issues on lead locomotive E/76. Multiple fault conditions prevented normal operation, and initial troubleshooting efforts by the crew and Mechanical personnel were unsuccessful. To maintain service, BNSF locomotive 5326 was leased and coupled to the train to provide tractive effort. Although additional alarms were generated due to MU cable compatibility issues, Mechanical personnel determined the train could safely proceed with the freight locomotive providing propulsion.

Additional delays were incurred east of Winslow due to high wind warnings, flash flood warnings, and a recrew required near MP 187.8 on the BNSF Gallup Subdivision. Upon arrival at Gallup, NM, the train encountered a police hold ahead while authorities conducted a flood rescue operation in the area. Mechanical troubleshooting continued at Gallup; however, the MU communication issues between the leased BNSF locomotive and E/76 could not be fully resolved.

Train 4(20) subsequently departed Gallup with the leased BNSF locomotive providing tractive effort, continuing at reduced speeds through additional weather-related restrictions en route to Albuquerque, NM. Upon arrival in Albuquerque, locomotive E/76 was set out, allowing the BNSF locomotive and E/30 to operate together without further issue, and the train continued its trip.

Lunch was provided for the customers at Albuquerque inconvenienced by the late operation.

Train 774(21) Lompoc-Surf, CA - Rocket Launch

21JUL26: The US Space Force scheduled the launch of Space X, Falcon 9 Rocket, from Vandenberg Space Force Base in Southern California, at 743A-PT. The safe exclusion zone for this launch encompassed the railroad tracks north of Santa Barbara Station. This required that train 774(21) be held at Lompoc/Surf, CA at MP 299.2 on the UPRR Santa Barbara subdivision- until the rocket was safely underway. Once the rocket had been launched, the train was further delayed while UPRR maintenance-of-way personnel scanned the tracks for potential fallen debris.

BNSF Mendota Subdivision East of Mendota, IL - Loss of Shunt

20JUL26: BNSF advised that train 381(20) with E/ID4608, four cars, and 84 customers failed to activate crossings on the Mendota subdivision 11 miles east of Mendota at MP 72.18 and MP 72.05, which led to a loss of shunt. Additionally, train 380(20) with E/ID4602, four cars, and 153 customers was said to have experienced a loss of shunt between Earlville/MP 72.5 and Somonauk/MP 59.6 on the Mendota subdivision. As a result, it was necessary for these trains to stop and protect the crossings. Train 381(20) equipment was inspected by BNSF at Galesburg and train 380(20) equipment was inspected by Amtrak mechanical in Chicago. Train 6(18) was also required to stop and protect the crossings between MP 72.5 and MP 59.6 as a precaution.

BNSF signal personnel and a track inspector responded to the scene for an investigation. BNSF personnel found no exceptions to contamination or track circuits. All Amtrak trains operating on main track 1 were required to protect the crossings between Earlville/MP 72.5 and Somonauk/MP 59.6 until further notice. BNSF had trains 4(18) and 383(20) operate not exceeding 30mph through Earlville and Somonauk with flaggers in place to perform testing. These crews were not required to stop and protect account of the flaggers in place.

Train 382(20), with 53 customers onboard, was delayed at Earlville meeting BNSF freights BN/6400 and BN/4149 before crossing over to main track two and operating through the area.

21JUL26: BNSF advised that flagger teams would be in position at the two crossing locations in question to test train 381(21) and 380(21). The two crossings in question are Main Street/MP 72.22 and East Street/MP 72.07. A 30mph speed restriction was in place between Earlville and Somonauk for this reason. A 30mph speed restriction remained on main track 1 between Somonauk and Earlville with no box 2 protection required until the BNSF signal department was able to finish their investigation.
