Train 718(21) Oakland, CA - Fuel Rack Issues

21SEP26: Train 718(21) was originally scheduled to operate using equipment from inbound Train 713(21), consisting of locomotive C2006 and eight cars. The equipment was routed to the Oakland Maintenance Facility for cleaning and fueling; however, a leak was discovered at the fuel rack, preventing the equipment from being fueled while repairs were made.

An alternate plan was developed to utilize inbound Train 715(21) equipment, consisting of locomotive C2106 and eight cars, which had additional fuel available, with plans to refuel downline. BNSF and local fuel vendors were unable to accommodate the fueling request, requiring Train 718(21) to remain in the yard pending repairs to the Oakland fuel rack. Due to the resulting late departure, BNSF advised that the train could not operate east of Merced, CA, due to scheduled Maintenance of Way work windows.

The following service adjustments were implemented:

- Train 718(21) was terminated at Merced, CA, with one bus secured for customers continuing to Bakersfield, CA. The bus served all intermediate stops except Corcoran and Wasco.
- Train 711(22) originated at Merced, CA, with customers traveling between Bakersfield and Merced accommodated on the next available Gold Runner services.
