Train 53(17) Florence, SC - Engine Failure

17JAN26: Train 53(17) operating with engines 322, 354, 516, and 544 passengers onboard was delayed at Florence, SC on the CSX Charleston subdivision due to a diesel fuel leak on lead engine 322 that was discovered as the fuel vendor was pumping diesel fuel and noticed the leak. Upon inspection it appears the fuel line has popped off due to unknown reason and was causing the leak. The engine compartment pan was full and needed to be pumped out before departure to ensure diesel fuel leaking was minimal once the train proceed south. Amtrak management and CSX MTO were on site to begin containing the spill and cleaning up excess fuel in the engine compartment. Amtrak environmental was contacted during the event and were in contact with local field management to ascertain the amount of fuel lost. Estimated loss was between 200 to 250 gallons. Once the spill inside was contained, train 53(17) was able to proceed south.

CSX HAZMAT was contacted by the on site CSX MTO and arrived on scene at approximately 2:00 a.m. to begin addressing the leak on the ground.

Committee: Environmental, Andy Enzman
