Train 540(14) Berkeley, CA - Police Related

14OCT26: at approximately 4:37PM-PT, Train 540(14) 26/28312, 4 cars, E/JPBX920 was delayed at Berkeley, CA station/ MP6.3 on the UPRR Niles Subdivision due to a police hold in place to investigate after 4 suspicious bags were left behind on the train. This caused delays to multiple Amtrak trains with all rail traffic halted until the investigation was complete. The first two trains affected were 715(14) that was held at Gilman/MP7 and 545(14) was held at Richmond, CA station. Train 715(14) later advanced to the next crossing in order to allow passengers that wanted to detrain safe access to do so. All passengers on 540(14) in car 2, C/8022 where the bags were left, were initially moved to the next car until Berkeley police arrived and evacuated all customers to a safe location approximately 80 yards from the train. The Berkeley police department dispatched a K-9 bomb sniffing dog to the location to rule out a potentially explosive device. Two Amtrak Road Foremen along with Amtrak Police were on scene to assist with the situation. The K-9 unit could not rule out an explosive device and the Bomb Squad was then dispatched to the train.

Train 545(14) reported that all passengers had detrained, and the decision was made to terminate the train at Richmond and turn out as Train 548(14) originating at Richmond, This same equipment set also turned for Train 551(14). After several attempts at sourcing busses, one bus was arranged for the 20 passengers of 540(14) that remained at Berkeley to bring them to Richmond to board Train 548(14). Train 718(14) was also delayed departing Oakland, CA initial terminal due to this. After the bomb squad arrived and completed their investigation, finding no explosive devices, the train was released to Amtrak Police at 9:42PM-PT and all rail traffic resumed at 9:51PM-PT.

Due to the prolonged delays, the Uber Voucher program was initiated for affected Capital Corridor trains and train 715(14). During this service disruption, B.A.R.T. also provided mutual aid to Amtrak customers between Richmond and Berryessa. Service recovery was implemented onboard all affected trains, 20% discount of cafe items onboard Capital Corridor trains and 715(14) issued snack packs and water and had Pizza ordered to the train for remaining passengers.

Train 4(13) East of Needles, CA - Freight Train Interference

14OCT26: Train 4(13) containing 107 customers onboard was delayed west of Needles, CA, at MP 645.5 on the BNSF Needles Subdivision after striking debris that caused multiple air hoses to separate. The crew reconnected the affected hoses; however, the train remained stopped due to a derailment involving BNSF stack train S-LHWCX01-12L, led by BNSF 8401, near Danby (MP 634.8). Approximately 20 railcars were reported derailed on the field side of Main Track 2, with possible tie damage requiring assessment by Maintenance of Way personnel and a track inspector.

Train 3(12) was held at Kingman, AZ, due to the derailment and was later released westward. Main Track 1 was subsequently restored for service, with Train 4(13) scheduled to proceed after meeting 4 westbound freight trains. The outbound crew from Train 3(12) was split to provide crew coverage for Train 4(13) into Kingman.

12OCT26: Pacific Surfliner service experienced delays due to high-tide conditions affecting the Metrolink Orange Subdivision east of San Clemente Pier between CP Pier (MP 205.14) and CP SONGS (MP 209.18). The high tides caused track indication failures, requiring trains to flag through the affected area at restricted speed. Single-track operations between CP Serra (MP 199.9) and CP SONGS contributed to additional train meets and cascading delays throughout the corridor.

The following equipment adjustments were implemented to mitigate service impacts:

-Equipment from Train 572(12) was turned at San Diego, CA, to operate Train 785(12) between San Diego and Los Angeles.
-Equipment from Train 774(12) was turned at San Diego to operate Train 587(12).
-Upon arrival in Los Angeles, CA, the Train 587(12) equipment was reassigned to operate Train 785(12) between Los Angeles and Goleta, CA.

13OCT26, continued high tides caused additional debris to accumulate on the right-of-way, resulting in multiple train movements being halted while Maintenance of Way personnel established track and time to inspect and clear the affected area. Once the debris was removed and the track was determined safe for service, rail traffic resumed normal operations. As a result of the service disruption, the following service adjustments were implemented:

Train 572(13), Train 579(13), Train 588(13), and Train 593(13) were canceled. Customers were accommodated on the next available trains.
Train 566(13) terminated at the San Juan Capistrano, CA station, with customers accommodated on Train 770(13). Train 566(13) returned to Los Angeles, CA Union Station.
Train 769(13) terminated at the Oceanside, CA station, with customers accommodated on Train 573(13). Train 769(13) returned to the San Diego, CA station and operated as Train 777(13).
Train 581(13) was canceled, with customers accommodated on Train 777(13).
Train 584(13) was canceled.

14OCT, the following service adjustments were implemented due to anticipated high-tide delays:
Trains 572, 579, 588, 593(14-15) were canceled. Customers were accommodated on the next available trains.
